

Job Description

JOB TITLE: Associate, GIS and Research Analyst
www.velocityretail.com

Submit Resume to: **careers@velocityretail.com**

SUMMARY:

This position is primarily responsible for producing maps and research related materials utilizing MapInfo software that provide our clients analysis in their retail real estate decision-making process. The position provides timely and high-quality service to clients and brokers by managing multiple steps in the real estate process. This position will be part of a dynamic company executing transactions for leading retail clients.

ESSENTIAL DUTIES AND RESPONSIBILITIES:

Produce maps using MapInfo for commercial real estate marketing & planning uses

Analytic and graphic design sensitivity to plan map styles according to use: street map, aerial maps, DEM & demographic maps

Maintain databases of retailers, traffic counts, shopping centers, road construction changes, housing developments & imagery

Research & manipulate location data in MS Excel to prepare for geocoding

Run demographic reports using on-line applications

Digitally enhance aerial photography using Photoshop, InDesign and Illustrator

Translate, modify & register site plans, master plans & logos, including custom symbols

May also assist clients to choose & analyze demographic data for site selection models

Manage, update & edit retail layer

Responsible for quarterly vacancy study and associated client presentation

Research real estate and economic trends providing reports to sales force for client's use

Utilize Google Earth and Google Maps for 3D imagery graphics

KML/KML Google Earth development

Miscellaneous duties as directed

QUALIFICATIONS:

MapInfo experience preferred and knowledge of on-line GIS resources

Prior market analysis (retail location-based GIS) highly desirable

Excellent knowledge of Microsoft Word, Excel, PowerPoint, Adobe Suite, Photoshop

Project management & organizational skills

Strong attention to detail

Ability to “drill down” & figure things out - provide solutions to problems

Work independently, supporting multiple teams

Receptive & willing to learn new technologies

Ability to communicate changing workload & manage multiple concurrent deadlines

Willingness to take full ownership of responsibilities

EDUCATION AND/OR EXPERIENCE:

Bachelor's degree (B.A.) from four-year college or university; or two to three years related experience and/or training.
