Handbook Objective

The objective of this handbook is to provide the School of Geographical Sciences and Urban Planning’s (SGSUP) prospective and enrolled graduate students information on policies and procedures required for successfully completing a graduate degree at Arizona State University, within SGSUP. This handbook is not all-inclusive of every university policy, nor is it a complete replica of other handbooks or manuals; however, references are made to other handbooks and links provided for students to review full details on policies outside of the school. Handbooks and plans of study from previous academic years are available in the Graduate Programs Archive.

ASU Charter

ASU is a comprehensive public research university, measured not by whom it excludes, but by whom it includes and how they succeed; advancing research and discovery of public value; and assuming fundamental responsibility for the economic, social, cultural and overall health of the communities it serves.

Mission

The School of Geographical Sciences and Urban Planning (SGSUP) advances geospatial knowledge for a complex world, emphasizing education, research, and applied solutions to urban and environmental problems.

- We are a distinctive community of physical and social scientists whose blended expertise is producing breakthroughs in geography and urban planning.
- We are committed to the social and environmental well-being of communities, places, and people.
- We are world leaders in spatial science and urban climatology.
- We are emerging leaders in urban planning and social equity, transportation, earth surface processes, urban systems analysis, human environmental systems.

SGSUP is committed to providing an inspiring educational experience for all students. Graduate students earning master’s degrees acquire the skills needed to become leaders in their professions. Graduate students earning doctorate degrees develop high-level expertise in scholarship, garnering academic, government, and consulting positions and success as independent scholars. Faculty undertake research that is both useful to society and internationally influential. The school actively interacts with alumni to enhance life experiences and encourage them to creatively offer support for the school. The school is noted for its distinctive mixing of geography and urban planning in teaching, research, and service.

Research

At the School of Geographical Sciences and Urban Planning, our distinguished faculty members are focused on the world’s most-pressing environmental and societal issues, including climate science and policy, water resource management, disaster relief, housing and community development, renewable energy, and sustainable growth. With a central focus on location and urban places, we study how places are organized and function, what they mean to the people who live in them, and how they can be best adapted to meet tomorrow’s challenges of environmental and societal change.
We offer research opportunities to both undergraduate and graduate students and collaborate with other Schools within the University and beyond to develop innovative approaches and ideas. Visit the links below to learn more about our research areas and the faculty researchers working in these areas.

- Computational Spatial Science
- Place, Identities and Culture
- Community Development for Social Equity
- Transportation Planning and Policy
- Earth Systems & Climate Science
- Sustainability Science & Studies
- Spatial and Economic Analysis
- Urban Design and Sustainable Cities

**SGSUP Personnel**

Led by Director David Sailor, the school's nationally- and internationally-recognized faculty includes three members of the National Academy of Sciences as well as members of national and international committees and panels such as the National Research Council Geographical Sciences Committee and Intergovernmental Panel on Climatic Change.

**Program Indicators**

The tables below reflect the most recent data available from ASU Analytics.

Resources

Facilities

The School of Geographical Sciences and Urban Planning is located on the fifth floor of Lattie F. Coor Hall. A computing commons is housed on the first floor and classrooms are located on the southern perimeter of the first floor and in the lower level, beneath the first floor. A computer lab with GIS-equipped Mac computers is located on the first level. A second computer lab is on the fifth floor of Coor Hall, and both these labs belong solely to SGSUP. Studio space is located in Stauffer Hall, which is located beside and directly north of Coor Hall. Several classrooms on the second floor were renovated to provide two new spacious designated classrooms/workshops/studios.

Computing

With computer-equipped workshop space and two computer laboratories the School is well-served and has the computer capability to successfully support the new technology-based course work. Course fees pay for the purchase and maintenance of this equipment; the computers are state-of-the-art. SGSUP’s GIS program computers are cutting-edge.

Each designated planning studio/classroom is equipped with eight student-use computers. The computers are available to students for research and study in the open lab time between the classes scheduled in the room.

The University Technology Office (UTO) provides a variety of services and applications, including those required for development, research, and other learning needs. A UTO Systems Support Analyst has offices onsite to provide IT support to SGSUP students, faculty, and staff.
Offices and Workspace

PhD students will be assigned desk space upon arrival. Master’s students are not guaranteed desk space but may request to reserve one of the SGSUP conference rooms as needed, for study groups, TA meetings, or other program-related purposes. MUEP students have access to the MUEP Collaboration space, which is equipped with computers and planning-related resources. The MUEP Collaboration space can be used for meetings or individual study and is available on a first-come, first-served basis. All MUEP students are eligible to access the MUEP Collaborative Space, following completion of the MUEP Office Space Agreement, available from the MUEP Program Coordinator. Use of this space is limited to MUEP students only.

Academic & Professional Services

ASU Library

The ASU Library system has over 3 million volumes and comfortably supports teaching and research for both students and faculty. Reflecting its recent emphasis on shifting to electronic content, ASU Library has aggressively licensed full-text journal packages and databases for use by students and faculty. Accessed from campus or remotely, these materials are available 24 hours a day, 7 days a week. Faculty and students can electronically request (non-Reserve) books from any of the four campus libraries to be picked up in whichever library is most convenient; these books can be returned to any ASU Library location.

When materials are not available in any of the ASU Library locations, ASU Library provides subsidized inter-library loan services for faculty and students.

The Design and Arts Library holds over 55,000 items including books, periodicals, CD-ROMs, videos, and microforms. The library’s subject coverage focuses strongly on Design, including: Architecture, Landscape Architecture, Urban Design, Housing, Planning, Interior Design, Graphic Design, and Industrial Design. It provides access to an excellent collection of books, periodicals, reports, videotapes, DVDs, CDs, microforms, archival drawings and collections all focused to support the Design disciplines.

Hayden Library, the main social sciences and humanities library, constitutes another valuable source of research information, particularly via its collection strengths in subject areas such as: social sciences, social policy, economic development, community development, and in its Government Documents Collection.

The school also is supported by the Noble Science Library in such subject areas as: transportation technology, environmental sciences, and GIS. It is further supported by the Map Collection in Noble Library with its extensive assortment of maps and aerial photographs (with particular emphasis on Maricopa County and Arizona -- including contemporary and historic images).

In addition to providing reference assistance in person, by telephone, or by e-mail in all the ASU Library locations, the ASU Library system offers a 24/7 virtual real-time chat reference service. The subject librarian for Geographical Studies and Urban Planning is Mimmo Bonanni.

Career Services

ASU Career Services offers many services and resources, including career advising, assistance with resume writing, interview preparation, networking, and job search. Career Services holds job fairs on-campus every semester and has recently implemented Handshake, an online tool for connecting with prospective employers for internships and employment. An MUEP Program Coordinator can assist with the professional development of MUEP students. The Career Counselor can assist all other students.
Graduate Academic Support Center

ASU offers a dynamic, supportive learning environment and programs for ASU graduate students enrolled in any graduate certificate or graduate degree program.

The Math Tutoring Center provides any graduate student with free one-on-one appointment-based tutoring for statistics coursework as well as peer guidance on the quantitative analysis portion of thesis, dissertations or other research projects. Graduate students can make an appointment with a consultant to discuss and work on:

- Statistics coursework
- Data cleaning and proper formatting
- How to perform analysis using software such as SPSS, SAS, R, Excel, Minitab and JMP
- How to explain the meaning and significance of your results in writing

Graduate students can work with consultants at the Writing Centers & Graduate Academic Support Center at any stage of the writing process to hone their writing skills and to receive coaching advice about navigating graduate life. ASU offers online writing tutoring in addition to four on-campus locations to serve ASU graduate students. The Tempe, Thunderbird, West, and Downtown Phoenix campus centers also offer graduate students a place to read and write or to meet with a writing group. ASU Writing Centers also facilitate Dissertation Writing Camps during the summer.

Student Support Services

Healthcare & Insurance

All students, whether they have health insurance or not, are eligible to use ASU Health Services. Graduate students must be enrolled in a graduate degree or certificate program and registered for at least three credit hours or one dissertation/thesis hour.

Visit ASU Health Services for additional information and instructions regarding Student Health Coverage Options, Eligibility & Enrollment.

International students will automatically be enrolled in the student health plan upon registration for class. For students with an RA/TA appointment, refer to the Benefits section of the TA/RA Handbook for additional health insurance information.

All students are required to meet the measles, mumps, and rubella (MMR) immunization requirement before class registration. You will see an MMR Immunization hold in the Priority Tasks module in My ASU until your MMR information is received and verified. Read additional information about MMR and other immunization information at ASU Health Services.

Accessibility Resources

Student Accessibility and Inclusive Learning Services (SAILS) provides services to qualified students with disabilities on all ASU campuses. Services include testing accommodations, note taking services, on-campus transportation, and more. Students new to ASU must log into DRC Connect to get started with registering with the SAILS office. Contact SAILS to determine eligibility and submit required documentation.
Veteran’s Resources

ASU has a robust veteran student services center. The Tillman Center offers advising, assistance with GI benefits, military transfer credit and other services. The Tillman Center is staffed almost entirely by veterans who relate to the challenges that new students experience and provide support in navigating complex governmental systems.

Counseling Services

Students are eligible for personal counseling services at ASU. ASU Counseling Services offers confidential, time-limited, counseling and crisis services for students experiencing emotional concerns, problems in adjusting, and other factors that affect their ability to achieve their academic and personal goals. They will talk with you, help you identify solutions or support, and connect you with those services at ASU or in the community.

Inclusive Excellence

The Office of Inclusive Excellence works to empower and give voice to all members of the university community in the areas of scholarship, teaching, learning and governance. The office was created to continue ASU’s commitment of creating an inclusive environment by providing on-going programming and initiatives for the campus community. There are a wide range of resources and groups at ASU, locally and nationally to support students’ educational and individual journeys. Graduate College Diversity Resources are also available.

Title IX

ASU prohibits all forms of discrimination, harassment, and retaliation. To view ASU’s policy please see https://www.asu.edu/aad/manuals/acd/acd401.html.

Title IX protects individuals from discrimination based on sex in any educational program or activity operated by recipients of federal financial assistance. As required by Title IX, ASU does not discriminate on the basis of sex in the education programs or activities that we operate, including in admission and employment. Inquiries concerning the application of Title IX may be referred to the Title IX Coordinator or to the U.S. Department of Education, Assistant Secretary, or both. Contact titleixcoordinator@asu.edu or 480-965-0696 for more information. Office located at 1120 S. Cady Mall, INTDSB 284. For information on making a report please go to www.asu.edu/reportit/.

Business Services

Student Accounts

Student Business Services offers a variety of student account services including tuition and billing, student refunds (including financial aid), receipt and payment processing, support for past due accounts, third party sponsorship assistance and loan repayment. Contact Student Business Services for assistance with student account questions.

Parking and Transit

ASU offers many parking and transit services, including permitted lot and garage parking, campus shuttles, bike lockers and bike valets. Visit ASU Transportation for parking maps, shuttle routes, and permit policies.
City of Tempe also has options for traveling to and from campus, including bus, neighborhood circulators, and light rail.

Sun Card

Students must obtain an ASU identification card. The Sun Card is the official student ID for ASU and provides access to campus amenities and services, including secure buildings and elevators as needed. The Sun Card office is in the Memorial Union lower level. Visit Card Services for more information on the types of cards offered.

Campus Amenities

Dining

There are multiple options for dining on-campus. Sun Devil Dining manages dining halls, kiosks, restaurants, and convenience stores in the Memorial Union and other locations at the Tempe campus. Students may make purchases with cash or conventional card payment or use meal plan credits. Learn more about meal plans here.

Shopping

Textbooks, supplies, ASU apparel and gifts, and computing technology can be purchased on campus at the Sun Devil Campus Stores. There are two locations at the Tempe campus, on Orange Street and at the Sun Devil Marketplace.

Entertainment

ASU offers many options for culture and entertainment on campus. From top-rated Broadway shows at ASU Gammage to PAC-12 Sun Devil Athletics, from the ASU Art Museum to the Marston Exploration Theater, there is something for everyone.

Moving to and Living in Arizona

The School of Geographical Sciences and Urban Planning does not formally endorse any external resources. However, they can be helpful for students relocating to the Phoenix metro area and wishing to develop community connections.

Costs (Tuition & Fees)

The costs of enrollment can be obtained from ASU Financial Aid and Scholarship Services. Tuition and fees are subject to annual approval by the Arizona Board of Regents.

The following programs assess an additional program fee above the posted tuition and university fees:

<table>
<thead>
<tr>
<th>Program</th>
<th>Fee</th>
</tr>
</thead>
<tbody>
<tr>
<td>Geographic Information Systems (MAS) - Tempe</td>
<td>$400 / credit hour</td>
</tr>
<tr>
<td>Urban and Environmental Planning (MUEP) - Tempe</td>
<td>$194 / credit hour (caps at $1750 / semester)</td>
</tr>
<tr>
<td>Urban and Environmental Planning (MUEP) – ASU Online</td>
<td>$400 / credit hour</td>
</tr>
<tr>
<td>Geography (MA) – ASU Online</td>
<td>$100 / credit hour</td>
</tr>
</tbody>
</table>

Use the Tuition Estimator to calculate estimated total tuition and fees. Refer to the cost per credit hour tables for a more accurate reflection of costs based on actual expected enrollment.

Visit Standard Cost of Attendance to estimate total costs, including tuition, books, supplies, and living expenses. Students are responsible for understanding the costs of attendance.

For questions about financial aid and cost of attendance, please contact Student Financial Assistance.

For questions about billed tuition and fees, please contact the Student Accounts Office.

Funding Your Education

There are numerous opportunities available for funding your educational and research-related travel expenses. Financial Aid for Graduate Students is a great place to start for need-based state and federal financial aid, including loans and scholarships. International students, while not eligible for state or federal aid, can visit Financial Aid for International Students for other resources available for funding graduate study at ASU.

Fellowships

Graduate College offers various fellowships and awards to graduate students. Some awards require department nomination; some are open for student application. Information and instructions regarding applying for these awards will be sent to the student listservs periodically.
The Graduate and Professional Student Association (GPSA) is a student organization that provides funding opportunities. Visit GPSA’s funding webpage for more information.

SGSUP administers various fellowships and awards. Information regarding applying for these awards will be sent to the student listservs periodically.

Local, national, and international award opportunities are available from planning and geographical organizations.

Students are responsible for observing application deadlines and eligibility requirements.

Assistantships

Students with teaching or research assistantships (TA/RA) are treated as Arizona residents for tuition billing purposes, regardless of residency.

Assistantships with half-time (20 hours per week or 0.50 FTE) appointments receive a full tuition remission and student health insurance at no cost; however, enrollment in the insurance plan is required each semester. Spring semester insurance coverage includes the summer months.

Assistantships with quarter-time (10 hours per week or 0.25 FTE) appointments receive a 50 percent reduction in in-state resident tuition. Students with TA/RA appointments are billed at the Arizona resident tuition rate.

University fees are not waived or remitted for TAs/RAs. The MUEP program fee is not waived or remitted for TAs/RAs.

Example estimate with tuition remission.

Tuition and fee cost comparison estimate* for non-resident, on-campus, MUEP student with and without quarter-time (0.25 FTE) TA:

<table>
<thead>
<tr>
<th>WITH QUARTER-TIME (0.25 FTE) TA POSITION</th>
<th>WITHOUT TA POSITION</th>
</tr>
</thead>
<tbody>
<tr>
<td>$280.00 graduate student fee</td>
<td>$280.00 graduate student fee</td>
</tr>
<tr>
<td>$746.00 student initiated fee</td>
<td>$746.00 student initiated fee</td>
</tr>
<tr>
<td>$3,500.00 MUEP program fee</td>
<td>$3,500.00 MUEP program fee</td>
</tr>
<tr>
<td>$12,562.00 AZ resident tuition (9+ credit hours)</td>
<td>$26,496.00 non-resident tuition (9 credit hours)</td>
</tr>
<tr>
<td>$17,088.00 subtotal before TA tuition remission</td>
<td>$31,021.00 total (per semester)</td>
</tr>
<tr>
<td>$6,281.00 50% TA tuition remission</td>
<td></td>
</tr>
<tr>
<td>$10,807.00 total (per semester)</td>
<td></td>
</tr>
</tbody>
</table>

*Estimate only. Assumes 9 credits enrolled, based on the Tuition Estimator. The estimate does not include other charges that students may incur such as student health insurance or class fees (varies depending on specific classes enrolled). This also does not include summer costs, should students choose to enroll during the summer term. Students are responsible for understanding the costs of attendance.

In addition, assistantships pay a modest stipend, outlined below. For more information on assistantship benefits and eligibility, please refer to Graduate College.
International students on F-1 and J-1 visas are eligible for assistantships but should consult with the International Student Services Center to ensure compliance with university and U.S. immigration policy. Students on H-1B visas are not eligible to hold RA or TA positions.

**Teaching Assistants/Associates**

TAs provide services which may include lecturing, leading discussion groups, serving as assistants to laboratory classes, and grading tests and papers, under the supervision of a faculty supervisor.

**TA compensation:**

<table>
<thead>
<tr>
<th>FTE</th>
<th>DURATION</th>
<th>COMPENSATION</th>
<th>NOTE</th>
</tr>
</thead>
<tbody>
<tr>
<td>PhD</td>
<td>0.50</td>
<td>semester</td>
<td>$12,293.00</td>
</tr>
<tr>
<td>MUEP</td>
<td>0.25</td>
<td>semester</td>
<td>$6,146.50</td>
</tr>
</tbody>
</table>

Students admitted without funding commitments may be considered for TA positions on a semester-by-semester basis (*for fall and spring only*). Students may apply for teaching assistantships online and must do so each semester. Information and instructions regarding applying for these positions will be sent to the student distribution lists every fall and spring semester. Students are responsible for observing application deadlines.

**Graduate College Training** is required for all newly hired TAs and designed to provide new Teaching Assistants/Associates (TAs) with an orientation to ASU and the TA position. The role of the TA varies widely across campus and the training modules seek to meet the needs of each TA by providing development that can be customized.

Students who are non-native English speakers who wish to be considered for a teaching assistant position must meet spoken English proficiency requirements. This includes students who may have had TOEFL or IELTS requirements waived for admission.

Spoken English proficiency can be demonstrated in four ways:

- SPEAK Test score of 55
- TOEFL (iBT) oral portion: score of 26
- IELTS spoken portion: score of 8
- ITA Teacher Training: pass with result of certified

Requirements must be met prior to starting a TA assignment. For more information visit the International Teaching Assistant Program or contact globallaunchITA@asu.edu.

**General Guidelines on MUEP TA Eligibility and Assignments**

I. Generally, MUEP and PhD Planning students teach/TA PUP or GIS courses; PhD Geography and GISc students teach/TA GCU, GPH, or GIS courses.

II. Master’s students should TA for undergraduate courses; graduate level courses needing support should be assigned a PhD TA.

III. ASU online MUEP students are not currently eligible for a TA (subject to change).
IV. Students should be assigned an A and a B session or a C session, so that they have consistent work over the entire term.

V. Observe other RA/TA policy as set by Graduate College.

VI. Prioritizing MUEP students for TA assignments (A and B considerations listed below occur concurrently):

A. Academic and Funding Status/History
   1. Students with funding commitments.
   2. Second year students that have never received any MUEP TA funding.
   3. First year students that have never received any MUEP TA funding.
   4. Second year students that have received prior MUEP TA funding.
   5. Accelerated students in their graduate year.
   6. First year students that have received prior MUEP TA funding.
   7. Concurrent MUEP students in their third graduate year or more.
   8. Students in their third graduate year or more that have received prior MUEP TA funding.

B. TA Application and Preferences
   1. The student’s availability and preferences to TA for specific classes.
      a. When students submit their TA applications, they are instructed that they are responsible for coordinating their own work and class schedules.
      b. Students should not apply to TA for a specific course if they will not be available to attend class meetings.
      c. If a student’s schedule or preferences change before the application deadline, it is the student’s responsibility to notify SGSUP’s graduate support team.
      d. If a student does not provide sufficient notice before the deadline and is selected to TA for a course that they are no available to attend or they no longer want to TA for, the position will be reassigned, and the student will not be guaranteed a new assignment.
   2. The student’s relevant skills and experience to TA for specific classes.
      a. Students should not apply to TA for a specific course if they believe they do not have the necessary skills or experience.
      b. If a student discovers they do not have the necessary skills or experience to TA a course they selected before the application deadline, it is the student’s responsibility to notify SGSUP’s graduate support team.
      c. If a student does not provide sufficient notice before the deadline or it is determined later that the student does not have the necessary skills and experience required to
Medical/Compassionate Withdrawal & Graduation

TA the course, the position will be reassigned and the student will not be guaranteed a new assignment.

3. The student’s English proficiency.
   a. Students must be assigned to courses that are appropriate to their proficiency level.

4. A faculty member has notified the graduate support team and received acknowledgment of their general support of a student or having the student TA for their course(s).
   a. Students with recorded support from faculty are not guaranteed any assignment.

5. The student has actively communicated with and received acknowledgment from the MUEP Director and graduate support team of their need for financial support.
   a. Students should notify the MUEP Director and graduate support team each semester before the TA application deadline outlining their need for financial support.

6. The student’s grade point average (i.e., GPA).

7. The student has actively communicated with and received acknowledgment from the MUEP Director and graduate support team of their need for an assignment due to extenuating circumstances.

VII. Guidelines for assigning MUEP students to .50 FTE appointments:

A. In general, .50 FTE TA positions for MUEP students are not favored by SGSUP due to the time commitment.

B. A student may be offered an additional .25 FTE if no other students are eligible or interested. If more than one student is interested in one available TA assignment, the guidelines above are followed. All things equal, we may consider the following to determine who receives the additional assignment:
   1. Faculty Preference/Support
   2. Expressed Financial Need
   3. GPA
   4. Any Extenuating Circumstances

C. Students receiving .50 FTE (20 hours/week) should be assigned to a Session C class OR Session A & B courses. Do not assign a student to a C and an A, for example. Also, do not assign a student to two Session A or Session B courses.

D. MUEP students with .50 FTE should work with the same faculty member for the entire sum of their weekly hours for the assigned session if possible.

VIII. The total number of hours worked per week for the duration of the semester shall not exceed 10 (.25 FTE) or 20 (.50 FTE) regardless of which session(s) (A, B, or C) the TA is assigned to.
IX. If a student does not sign and return their offer/appointment letter by the deadline stated on the letter, their assignment will be automatically withdrawn. This will be considered a voluntary forfeit of the position by the student. The position will then be immediately reassigned to another student.

X. Students should regularly communicate with the graduate support team and MUEP Director when they have any questions about the status of their funding commitment or the prospect of being assigned a TA in the future.

XI. TA supervisors may submit TA evaluations for MUEP students. The results will be sent and reviewed by the MUEP Director. At the MUEP Director’s discretion, a student’s past TA performance may impact the student’s eligibility for future assignments when no active commitment is present.

Research Assistants/Associates

RAs are selected for excellence in scholarship and promise as researchers. They do part-time research as a portion of their training under the direct supervision of regular faculty members. RA appointments are generally only available to PhD students.

RA stipends are prorated for .25 FTE appointments and for one-semester appointments.

TA/RA appointments are, by definition, semester appointments. TAs/RA should not assume that they will be reappointed merely because no notification or termination at the end of the appointment period has been received. Reappointments are subject to and contingent upon the continuing availability of funds and the TA’s/RA’s satisfactory performance. TAs/RA will work directly with a faculty supervisor to coordinate duties and work hours. Faculty supervisors will approve absence and leave requests and will evaluate TA/RA performance at the end of each semester.

In considering reappointments, the hiring unit or project director must consider the TA’s/RA’s contribution to the objectives of the unit or project along with the assistant’s/associate’s academic progress. Students must maintain Satisfactory Academic Progress to be eligible for an assistantship.

Parental Leave

Postdoctoral scholars and graduate students with a .50 FTE teaching or research assistantship (TA/RA) appointment who have completed at least one academic year’s service are eligible for up to six weeks of paid parental leave for the birth or adoption of a child and will continue to receive their stipend and associated benefits (health insurance and tuition remission) during this six-week period.

If both parents are postdoctoral scholars or graduate students with a .50 FTE TA/RA appointment who have completed at least one academic year’s service, both parents may receive the accommodation.

The TA/RA must maintain a minimum enrollment of six credit hours during the term of paid leave. Any portion of the six-week period that falls outside the appointment term will reduce the amount of available paid parental leave on a pro-rated basis.

Funding Guarantee

Select PhD applicants will be offered up to four years of funding, which will be in the form of research or teaching assistantships, fellowships, or any combination of these. Funding packages are formally offered to selected students in writing upon admission to the program.
MUEP applicants who apply by the funding deadline are considered for one or two-year funding packages on a merit basis. Funding packages are formally offered to selected students in writing upon admission to the program.

MA Geography and MAS Geographic Information Systems students are not eligible for funding packages, although they may apply for student employment and fellowships as they become available.

Research Support Funding (PhD)

PhD students are eligible to receive up to $500 in research support funding annually (unused funds do not roll over into the next fiscal year), while they are within their funded period. PhD students who have reached candidacy and are outside their funded period are not eligible for research support funding without explicit approval from the Associate Director of Graduate Programs.

Research support funds may be used for travel, memberships, supplies, datasets, and other approved purchases. Textbooks or computers may not be requested and software needs pre-view and approval.

1. Submit a request to the Assistant Director of Graduate Programs, with the item(s) you are requesting, including quotes or pricing, along with your business purpose/use.
2. Once approved, forward the email to SGSUP-Business@asu.edu for review and processing.
3. You should receive confirmation that your order has been placed and will be notified by the business office as soon as your package(s) have arrived.
4. If your funds are approved for travel, attach the approval email to your travel request in CONCUR and use account CC0639 PG11856 for a max of $500.
5. If you would prefer to make an in-store purchase and receive a reimbursement, please make a note with your request and if allowable, the business office will forward a reimbursement request from you to submit with your itemized receipts.

SGSUP-Business@asu.edu can assist with travel and ordering questions.

MUEP Opportunity Fund

The MUEP Opportunity Fund provides MUEP students up to $400 annually. This funding can be utilized for a variety of expenses, such as (but not limited to): the purchase of data for analysis in a project, specialized software to conduct such analysis, travel to a professional conference to present a paper or to better prepare for post-graduate career or to a field site to conduct research related to a course, thesis, capstone, or applied project. Unused funds do not roll over into the next fiscal year.

1. Submit a request to an MUEP Program Coordinator, with the item(s) you are requesting, including quotes or pricing, along with your business purpose/use.
2. Once approved, forward the email to SGSUP-Business@asu.edu for review and processing.
3. You should receive confirmation that your order has been placed and will be notified by the business office as soon as your package(s) have arrived.
4. If your funds are approved for travel, attach the approval email to your travel request in CONCUR and use account CC0639 PG06418 for a max of $400.
5. If you would prefer to make an in-store purchase and receive a reimbursement, please make a note with your request and if allowable, the business office will forward a reimbursement request from you to submit with your itemized receipts.
Please contact an MUEP Program Coordinator for more information and guidance on the use of these funds as needed. SGSUP-Business@asu.edu can assist with travel and ordering questions.

**SGSUP Policies and Procedures**

**Student Responsibility**

It is the responsibility of each student to understand and observe all procedures and requirements specified by Graduate College and the School of Geographical Sciences and Urban Planning. It is a requirement for all SGSUP students to read and understand the SGSUP Graduate Programs Handbook, the Graduate College Policies and Procedures Handbooks and the ASU Academic Catalog. Faculty and staff provide academic advising and assistance; however, the ultimate responsibility for meeting degree and other requirements remains with the student.

**Advising**

**Faculty Advisors**

When PhD students are admitted into their degree program, they are assigned a faculty advisor. The advisor-advisee match is made based on mutual research and topical areas of interest. New MUEP students will work with the MUEP Program Coordinator. MUEP students completing an applied project or thesis must identify a faculty advisor by the end of their first year. The MA Geography Coordinator will be assigned as the faculty advisor to new Geography MA students. MA Geography students completing a thesis must identify a faculty advisor by the end of their first year.

Faculty advisors may provide guidance on elective coursework, applied projects, research, and career advice or support. Students who are completing an applied project, thesis, or dissertation as part of their degree program must consult their faculty advisor to form a supervisory committee made up of members who can contribute to the student’s research; the faculty advisor generally acts as chair or co-chair of the committee. Refer to How to: Advisor and Committee for step-by-step instructions.

**Academic Advising**

Students are responsible for meeting all degree and program requirements, however, SGSUP graduate support staff are available to assist with interpreting policies and navigating university systems. Graduate support staff provide advising in many areas, including but not limited to:

- Admissions
- New student orientation
- Registration (including overrides/waivers)
- Degree requirements
- Plan of study
- Degree milestones (e.g., exams, defense)
- SGSUP policy
- Graduate College policy
- Funding opportunities (including RA/TA)
- Graduation
Students may access a number of SGSUP graduate student resources at their convenience to get answers to their advising questions, including:

**Plans of Study and Graduate Program Handbook.** Includes plans of study for all degree and certificate programs, approved electives, and suggested course lists.

**How To, Resources & Links.** Includes step-by-step how-to guides for common graduate student processes and links to other university resources.

**Graduate Student Forms.** Internal forms for requesting registration, funding, committee, and defense approvals, and more.

**Advising Appointments**

Advising is available by email or appointment (phone, virtual, or in-person). Students can visit the [graduate advising webpage](#) to make an appointment during a given semester. Students are strongly encouraged to review the SGSUP Graduate Programs Handbook prior to making an advising appointment. MUEP students can visit the [Advising and Career Development](#) webpage for detailed information on who to contact for specific questions. General inquiries sent to [SGSUP.gradadvising@asu.edu](mailto:SGSUP.gradadvising@asu.edu) will be routed to the appropriate person.

**Class Registration**

Students are required to register in or drop classes by the deadlines listed on the [Academic Calendar](#). To swap a class or to enroll in a class after the add-drop deadline, complete the [Enrollment Change Request](#) form.

Some courses require students to request permission to enroll. There are two types of permissions that may be needed. One is through obtaining a class number. The other is an override.
Class Number

Some courses do not appear in the published Schedule of Classes; therefore, students must request a class number to enroll in these courses. These “omnibus” courses include:

- Applied Project (593)
- Thesis (599)
- Research (592, 692, 792)
- Reading and Conference (590, 690, 790)
- Dissertation (799)
- Continuing Registration (595, 695, 795)

To request a class number: complete the Request to Enroll in Omnibus Course form. Students will receive instructions for registering in the course via email. Students must allow for processing time when submitting this request (e.g., if the request is submitted two days before the add-drop deadline, it may not be processed in time to enroll by the deadline).

The class number is valid only for one semester and must be requested each semester registration is desired.

Overrides

Some courses will require students to obtain override permission. The most common reasons for students to be unable to enroll in courses are instructor approval required, department consent required, and course full. Most SGSUP students should be able to enroll in school-offered courses without an override.

To request an override: obtain written/email approval from the instructor. Complete the Override Request form. Students will receive instructions for registering in the course via email. Students must allow for processing time when submitting this request (e.g., if the request is submitted two days before the add-drop deadline, it may not be processed in time to enroll by the deadline).

Courses that are outside of SGSUP may also have course permissions that restrict registration. All inquiries regarding courses that are not offered by SGSUP (GCU, GIS, GPH, PUP) must be directed to the school offering the course.

Program Communications

The school utilizes the following methods to disseminate new and/or changing information about SGSUP programs:

Email

Email is the official method of university communications. Students must use their assigned ASU email address, or they will miss important program communications. Program information is disseminated via email through the student listserv to those addresses. Please include your ten-digit ASU ID# in all emailed communications with the SGSUP graduate support staff and Graduate College.

For general inquiries, please use the following email address: SGSUP.gradadvising@asu.edu

ASU email can be forwarded to your personal email address, however, be aware that this does not work with all communications. Automated messages and distribution list messages may not be forwarded properly. Visit this Knowledge Article to learn more about the potential issues with email forwarding.
Students are responsible for checking email and responding to requests in a timely manner.

**Distribution Lists**

Program news, events, and announcements are communicated via the SGSUP email distribution lists. Program staff will add all new students’ official ASU email addresses to the appropriate distribution list(s). Students should contact the Assistant Director of Graduate Programs in the event they have something to share with the other graduate students.

**Social Media**

Follow SGSUP on social media:

- Facebook [@asu.sgsup](https://www.facebook.com/asu.sgsup)
- Twitter [@ASU_SGSUP](https://twitter.com/ASU_SGSUP)
- Instagram [@asu.sgsup](https://www.instagram.com/asu.sgsup)
- YouTube [@ASU.SGSUP](https://www.youtube.com/user/ASU_SGSUP)

**Professional Development**

**Student Organizations**

Visit SGSUP’s [Clubs and Organizations](https://www.asu.edu/sgsup/clubs-and-organizations) webpage for opportunities to get involved in organizations such as:

- [Gamma Theta Upsilon Geography Honor Society (GTU)](https://www.asu.edu/sgsup/gtughs)
- [Student Planning Association at ASU (SPA)](https://www.asu.edu/sgsup/spa)

These organizations, sponsored by SGSUP, support the school and foster communication and professional development within the ASU community and beyond.

**Graduate Student Committee**

SGSUP has an active Graduate Student Committee who serve as a liaison between graduate students, staff, and faculty. The responsibilities of the representative include to:

1. Increase information flow between faculty, staff, and graduate students
2. Represent the graduate student body at faculty meetings (typically monthly)
3. Share important updates and news from these meetings with the graduate student body
4. Voice graduate student concerns to department administrators
5. Support institutional memory
6. Strengthen community within the school

The Graduate Student Committee will share news, updates, and information to students throughout the academic year. An election will be held in December to select the new committee for the upcoming calendar year.
Graduate & Professional Student Association

The Graduate and Professional Student Association (GPSA) exists to advocate for and provide support and services for the graduate and professional student community of Arizona State University. GPSA advocates on behalf of graduate and professional students at local, state, and national levels, provides a forum for open dialogue between the graduate and professional student body and the university, aids in student organization and involvement, and administers services, resources, and benefits for the larger graduate body.

GPSA provides resources for graduate students including:

- Funding
- Events and activities
- Professional development
- Wellness programs
- Volunteer opportunities

Central AZ AMS-NWA

The Central Arizona Chapter has been serving Phoenix, Tempe, and other communities in central Arizona since its founding in 1967. We are the local joint chapter of the American Meteorological Society and the National Weather Association, with an active membership of over 100 operational professionals, broadcast meteorologists, academics, students, and weather enthusiasts.

Founded in 1919, the American Meteorological Society (AMS) is the nation’s premier scientific and professional organization promoting and disseminating information about the atmospheric, oceanic, hydrologic sciences. Our more than 13,000 members include scientists, researchers, educators, broadcast meteorologists, students, weather enthusiasts, and other professionals in the fields of weather, water, and climate.

The National Weather Association (NWA) is a professional association supporting and promoting excellence in operational meteorology and related activities since 1975. Members have many opportunities to share information, news, studies and concerns related to operational meteorology and to network with great people in a wide variety of careers (from well-known senior professionals to weather enthusiasts).

Arizona Planning Association Arizona (APA AZ) Mentorship Program

This career development program offered by the American Planning Association Arizona Chapter provides ASU planning students an opportunity to network with local planning professionals at regular intervals throughout the school year. The program aims to match students’ interests with professionals’ areas of expertise by tapping into the Phoenix area’s diverse talent pool. Public- and private-sector planners have volunteered to visit with ASU students in one-on-one or small group settings. The overall structure is specifically designed to provide enough guidance to develop meaningful relationships, yet flexible enough to accommodate the specific needs of students and schedules of busy professionals. The program’s mentors - ranging from young professionals to seasoned pros – sign on to support career development in a variety of ways, such as:

- Exposing students to a variety of planning specializations;
- Attending a professional development event and/or public meeting together;
- Assisting with course selection;
Critiquing individual resumes and portfolios;
Conducting mock interviews and helping to strengthen students’ interview skills; and
Providing pointers to assist in the internship and job search.

To join the Mentorship Program, a student must commit to meeting with his or her assigned mentor on a regular basis. Watch your email for an invitation to participate in the APA AZ Mentorship Program.

Career Development in SGSUP

SGSUP provides career and professional development opportunities to students. The Careers in Geography, GIS & Planning webpage provides job and internship postings, career development resources, sample job titles, alumni stories, and much more.

Career Navigator

Industry leaders share how they use geography, GIS, and urban planning in their careers. Visit Career Navigator for more information.

Planning Career Meet and Mingle

The Planning Career Meet and Mingle is held each year during the Spring semester. This event is open to undergraduate and graduate students studying urban planning.

The Planning Career Meet and Mingle is an opportunity for urban planning students to meet and network with planning professionals in a casual networking environment. This event is an opportunity to talk with planning professionals about their work and to expand their professional network. Some organizations in attendance may also be offering internships or full-time employment opportunities, providing a chance to learn more about positions ahead of applying and interviewing.

Planning Practitioner Lecture Series

Each academic year, two professional planning practitioners are invited to give a lecture on recent work for all our planning students. The evening lectures are followed by a social hour, providing students an opportunity to meet and talk with current planning practitioners in the region.

Student Business Cards

The school does not provide business cards for students, but students can order their own. All business cards are required to be printed through ASU Print Lab to ensure branding standards and correct identification. Students can access the portal to create, submit and pay for business cards at https://asuprintonline.asu.edu/students. MUEP students can use the MUEP Opportunity Funds to cover the costs for business cards.

Professional Etiquette at Events

As representatives of the school, students are expected to conduct themselves with professionalism, courtesy, and respect before, during, and after any school or university event. This policy serves to maintain a positive and inclusive environment conducive to learning, networking, and collaboration. Attire should be appropriate for the occasion. Punctuality is paramount, demonstrating respect for event organizers and fellow attendees. Throughout the event, students are expected to engage in respectful
behavior, including attentive listening, courteous dialogue, and refraining from disruptive actions. Networking opportunities should be embraced, with students encouraged to interact respectfully with speakers, faculty, and peers. Failure to comply with these expectations may result in disciplinary action, underscoring the responsibility of all students to uphold these standards for the benefit of themselves and the school.

**Code of Conduct**

All students are expected to adhere to the [ABOR Student Code of Conduct](#). Violations of the Student Code of Conduct, other than the provision concerning academic dishonesty, are more generally considered inappropriate behavior. The [Office of Student Rights and Responsibilities](#) reviews and sanctions these matters. If a student violates both the academic integrity provision and additional provisions of the Student Code of Conduct, both the college and the Office of Student Rights and Responsibilities will review the matter. Each independently makes determinations concerning violations and appropriate sanctions.

**Academic Integrity**

ASU has clear definitions of [academic integrity](#). The ASU student academic integrity policy lists violations in detail. These violations fall into five broad areas that include, but are not limited to:

- Cheating on an academic evaluation or assignment
- Plagiarizing (includes self-plagiarism)
- Academic deceit, such as fabricating data or information
- Aiding academic integrity policy violations and inappropriately collaborating
- Falsifying academic records

Violation of these standards can result in course failure or expulsion from the program. Refer to [The College Academic Integrity](#) and [Academic Integrity at ASU](#) for more information.

**Grievances and Appeals**

Students who are enrolled in a College of Liberal Arts and Sciences (The College) course and believe they have been unfairly or improperly graded may be assured of just treatment and fair consideration. Any such grievance must be started within the regular semester immediately following the course at issue, whether the student is enrolled in the university or not.

There are two stages to the grade grievance process, the informal process, and the formal process. Each contains a series of steps. The steps must be followed by any student seeking to appeal a grade. This process does not address academic integrity allegations, faculty misconduct or discrimination.

Refer to [The College Academic Grievance Policy](#) for more information and specific processes.

**Probation, Remediation, and Dismissal**

All graduate students are expected to make systematic progress toward completion of their degree. This progress includes maintaining [Satisfactory Academic Progress](#), and achieving the milestones and requirements set by the individual degree programs as well as the Graduate College. If a student fails to
satisfy the requirements of their degree program and/or the milestones outlined in the Programs Section, the student may be placed on probation or dismissed from their program.

Warning
Students will receive a written warning under the following circumstances:

- Nonresponse on the PhD Student Annual Review
- Unsatisfactory performance on the PhD Student Annual Review
- Not meeting with the MUEP Program Coordinator during the required semesters (MUEP only)
- Not completing a thesis or applied project after 6 months from the signed scope of work (MUEP only)
- Missed Milestones
- Unprofessional or nonresponsive communication with faculty, students, and/or staff
- The student is within one year of the maximum degree time limit as defined by the Graduate College (i.e., six years for masters and certificates and ten years for doctoral)
- PhD, Thesis, or Applied Project faculty advisor not identified or lapsed
- Not submitting a complete iPOS by the end of their first semester

Faculty advisors and/or relevant SGSUP leadership will receive a copy of the warning. Student must work with the faculty advisor or relevant SGSUP leadership to correct the deficiency within the time limit outlined in the warning.

Failure to address the deficiency outlined in the warning may result in the following:

- Academic Probation
- Withdrawal of faculty member from role as advisor

Academic Probation
Students are placed on academic probation under the following circumstances:

1. Whenever their overall graduate GPA, cumulative ASU GPA, or iPOS GPA drops below 3.0, as per Graduate College policy. Students on this type of probation have one semester to raise their GPA to 3.0 or above and thus return to good standing.
2. Upon failure to correct a situation outlined in a prior warning. This may include: nonresponse on the PhD Student Annual Review, unsatisfactory performance on the PhD Student Annual Review, missed milestones, not meeting with the MUEP Program Coordinator during the required semesters (MUEP only), not completing a thesis or applied project after 6 months from the signed scope of work (MUEP only), unprofessional or nonresponsive communication with faculty, students, and/or staff, failure to maintain PhD, Thesis, or Applied Project faculty advisor relationship, or for not submitting the iPOS on time as required by the Graduate College.

Students will be notified in writing of their probationary status and are expected to follow up with their faculty advisor or program’s leadership to discuss remediation plans or other strategies for improving academic performance. Upon meeting the conditions of probation, the student will be notified in writing of their restoration to good academic standing.
No grades of incomplete (I) may accrue while a student is on Academic Probation, and incompletes received prior to the probationary period must be completed by the end of the probationary period. Any Incomplete not resolved by the end of the probationary period will be changed to E.

A student may appeal their probation based on reasons in #2 above if there are extenuating circumstances. The student must provide justification for the deficiency, which can include support from their faculty advisor(s) and/or program’s leadership, to the SGSUP Graduate Committee who will make the final determination. **Probation based on GPA deficiency may not be appealed.**

Failure to address the deficiency outlined in the probation notice may result in the following as determined by the SGSUP Graduate Committee:

- Loss of partial or full school financial support, including RA/TA appointments or research/travel funds
- Loss of assigned office space
- Suspension of approval to enroll in omnibus courses such as research, reading and conference, or dissertation
- Recommendation for dismissal from the program
- Limits on the ability for the student to reserve rooms or other spaces
- Ineligible for SGSUP awards

**Dismissal**

A recommended dismissal of a student from the program represents the determination of the SGSUP Graduate Committee, through consultation with program leads, that the student has not demonstrated an expected level of performance in academic work, including research tasks, or in other critical areas of professional conduct. At the point of recommended dismissal, the student will not be given additional opportunities to remediate the deficiency. Depending on the circumstances, recommended dismissal might follow a period of academic probation. In other cases, it might not involve academic probation.

**Dismissal Criteria**

Possible causes for recommended dismissal include the following:

- Failure to maintain satisfactory academic progress as defined by SGSUP and Graduate College
- Violation of academic integrity policy as defined by ASU
- Deception or falsification of statements in the admissions application
- Unauthorized periods of absence from the graduate program
- Seriously compromising the relations of the school with the public
- Breaches of ethical judgment or professional responsibility
- Breaches of academic or scientific honesty (e.g., plagiarism, falsification of research data)
- Serious instances of personality or character traits or behaviors inappropriate for the professional roles for which the student is attempting to prepare him/herself
- Serious misuse of school or university facilities

**Rules regarding recommended dismissal**

The dismissal discussion is confidential.
The student may, but is not required to, appear before the SGSUP Graduate Committee, or provide the committee with a written statement, or both. Any oral or written statement by the student is expected to focus solely on the matter under consideration.

Performance standards on which a recommended dismissal could be based are written and made available to students upon entering the program. These standards may be found in a variety of sources internal and external to the program. Internal program documents include course syllabi, evaluation criteria, program milestone deadlines, and comprehensive examination standards. Documents external to the program include university regulations concerning academic or scientific misconduct, and federal regulations regarding the conduct of research with human subjects, as administered by the Institutional Review Board at ASU. Documents external to the program, being subject to change at any time, always supersede internal program documents when there are discrepancies between them.

The dismissal recommendation is made by the SGSUP Graduate Committee on a majority vote based on examination of the evidence. In the event of a tie, the SGSUP Director makes the final decision in consultation with non-conflicted faculty in the student’s area of study. In the event a clear conflict of interest exists with any members on the Graduate Committee, those members must abstain from voting. Examples of a clear conflict of interest include serving as the student’s faculty advisor, co-advisor, or they are actively funding the student. If Graduate Committee members must abstain from voting, they will be temporarily replaced on the committee by non-conflicted faculty in the student’s area of study, as appointed by the SGSUP Director.

If the committee’s decision is in favor of dismissal, the recommendation to dismiss the student is communicated in writing to the student and to Graduate College. The Associate Dean of the Graduate College makes the final determination.

Graduate College Policies

Plan of Study

The Plan of Study specifies the degree requirements such as coursework, committee, and culminating experience that students must complete. It is submitted and revised electronically via the interactive Plan of Study system (iPOS), accessed from the My Programs module in MyASU. The Plan of Study functions as a contract between the student, the academic unit, and Graduate College.

Students are required to complete their iPOS in their first enrolled semester. Students will be notified via MyASU when the iPOS requires submission. If the iPOS is not submitted by Graduate College’s deadline, both the Graduate College and unit will contact the student via their ASU email. If the iPOS is not completed after the deadline and these notices, the student may be subject to an academic warning or probation.

The iPOS must be approved by the unit and Graduate College. Refer to the Graduate College guide or How to: iPOS for details on submitting your Plan of Study.

An approved iPOS must be on file prior to completing comprehensive exams, dissertation proposal/prospectus, and thesis/dissertation defense.
Consult with your faculty advisor or graduate support team to determine what coursework is applicable to your degree. Plan of Study worksheets are also available to assist with planning coursework. Refer to the Program Sections for requirements and curriculum for each degree or certificate program.

**Course Waivers**

Students who have taken graduate coursework at other universities that may satisfy a program requirement at ASU may petition the faculty to waive the ASU requirement in favor of the previous coursework. A petition consists of the Course Waiver Form, the syllabus of the previously taken course, and any other materials (e.g., course description, reading list, exams) that speak to the nature of the course. Program faculty will determine course equivalence.

**Transfer/Pre-Admission Credits**

Students who have taken graduate coursework prior to admission to SGSUP may petition to include the transfer or pre-admission credit on the iPOS if the credit has not been used toward a previous degree. A petition consists of the Petition for Transfer or Interdisciplinary Elective Course, the syllabus of the previously taken course, and any other materials (e.g., course description, reading list, exams) that speak to the nature of the course. Program faculty will determine whether the course may be counted. The official transcript of the institution where these credits were earned must be on file with Graduate Admissions.

Graduate courses taken prior to admission that are included on the iPOS must have been completed within three years of the semester and year of admission to the program. Credits earned prior to admission are subject to ASU Graduate College’s policy on pre-admission credits.

**Satisfactory Academic Progress**

A student must achieve a 3.0 grade point average (GPA) or higher on all three GPAs (iPOS GPA, Cumulative ASU GPA, and Overall Graduate GPA) to maintain satisfactory academic progress and graduate. If a 3.0 GPA is not maintained, the student will be placed on academic probation. The student must collaborate with her/his advisor to make meaningful progress toward meeting University and program requirements. Please see Graduate College Policy and Procedures for greater detail.

- **iPOS GPA** is calculated from all courses that appear on the student’s approved iPOS
- **Cumulative ASU GPA** represents all courses completed at ASU during the graduate career
- **Overall Graduate GPA** is calculated from all courses numbered 500 or higher that appear on the transcript, except for courses counted toward an undergraduate degree at ASU (unless shared with a master’s degree in an approved bachelor’s/master’s degree program); and courses identified as deficiencies in the original letter of admission

All work toward the PhD degree must be completed within ten (10) consecutive years. Students must defend and graduate within five (5) years of completing comprehensive exams.

Master’s degree programs must be completed within six (6) consecutive years.

**Continuous Enrollment**

Once admitted to a graduate degree program, students must be registered for a minimum of one (1) graduate-level (500 or higher) credit hour for every fall and spring semester. Failure to register for any fall or spring term may result in being discontinued from the program. Refer to Graduate College for
additional details.

If enrollment is required but no course credit is needed, students may enroll in one (1) credit of Continuing Registration to meet the continuous enrollment policy. Refer to Class Registration for enrollment guidelines.

Additional credit hours over the one may be required for students with RA/TA appointments, fellowships, or international students. Students are responsible for knowing the terms of their own employment, awards, or visa status.

Summer registration is only required for students who are in any way using university facilities or faculty time during the summer. This includes:

- completing any culminating experience
- working on or defending the applied project or capstone
- doing an internship for credit
- taking a comprehensive exam
- defending a prospectus
- defending a thesis or dissertation
- having an RA/TA appointment
- graduating from the degree program

Leave of Absence

Students may request up to two semesters of non-enrollment during their entire program. Submit a Leave of Absence petition via the iPOS. This request must be submitted and approved before the anticipated semester of absence.

Medical/Compassionate Withdrawal

Students may be eligible for a medical or compassionate withdrawal due to extenuating circumstances such as a serious physical or mental illness (medical withdrawal) or the death/serious illness of a family member (compassionate withdrawal). Refer to The College of Liberal Arts and Sciences for withdrawal procedures. For more information regarding University medical and compassionate withdrawal policies, visit the Office of the Registrar.

Graduation

Students must apply for graduation via MyASU when ready; degree conferral does not happen automatically. Credentials evaluators in the Office of the Registrar must verify that students meet all degree and certificate requirements. All SGSUP program and Graduate College requirements must be met.

Commencement is a University ceremony; Convocation is a College ceremony. These are held twice annually, in the Fall and Spring. Attendance is not required but students must RSVP via MyASU if they wish to attend. Summer graduates wishing to attend Commencement are eligible to participate in the following Fall semester ceremony. For Convocation, summer graduates may attend either the preceding Spring or following Fall semester.

Commencement regalia (cap, gown, hood, stole) is available from the Sun Devil Campus Stores. Visit their
website after applying for graduation to order your regalia. Some items are available in store during the weeks leading up to commencement, but supplies are limited. It is recommended that students order their items during the Grad Fair.

Geography (MA)

About

The Geography (MA) program is designed to offer specialized academic and professional training in geographical sciences that enables students to secure a sound graduate background for further specialization or for immediate employment. The program has sufficient flexibility to allow for the individual needs and the interests of students.

Faculty and graduate students focus their research in one of four broad interdisciplinary themes:

- Computational Spatial Science
- Place, Identities and Culture
- Earth Systems and Climate Science
- Sustainability Science and Studies

Geography (MA) Application Instructions

Geography (MA) Admission FAQs
Curriculum

The Geography (MA) degree requires a minimum of 30 credit hours and either the completion of the capstone course or a defense of a master’s thesis.

The MA Geography degree is designed to be completed within two years; this includes the final milestone of completing the selected culminating experience. Part-time enrollment is permitted for MA Geography students.

Electives

Between 13 and 16 credit hours of additional elective coursework and/or research is required. Any graduate level GCU, GIS, GPH, or PUP course may be taken as elective, including Research and Reading & Conference credits. Interdisciplinary courses may be taken but must be approved by the Associate Director of Graduate Programs. Submit the Petition for Transfer or Interdisciplinary Elective Courses form to request approval. A maximum of six (6) credits of 400-level coursework may be included in the plan of study.

Use the Geography (MA) Plan of Study to assist in planning coursework.
Geography (MA)

Sequence & Timeline

* Thesis credits may be taken in any combination that adds up to six (6), but students are recommended to take them in the final year of the program. Students should consult with faculty advisor prior to enrolling in thesis.

Accelerated Master’s Degree
The School of Geographical Sciences and Urban Planning’s fast track approach allows highly qualified students who are finishing their Bachelor of Arts or Science in Geography (BA/BS in Geography & BS Geography (Meteorology-Climatology)) to be enrolled simultaneously in the Master of Arts in Geography degree program. These students are permitted to take up to 12 credits of graduate courses as undergraduates after admission to the fast track.

GCU 496 Geographic Research Methods cannot be used as a substitute for the required GCU 596 Geographic Research Methods course.

Visit the Accelerated BA/BS-MA Program website and refer to the Accelerated MA Plans of Study for more information.
Culminating Experience

The Geography Capstone course is the default culminating experience for MA Geography students. Students preferring to pursue an individualized culminating experience project must be aware that:

- Individualized culminating experiences require significant effort, initiative, and discipline by the student
- Students are responsible for identifying a research question
- Faculty advisors will supervise the thesis; they will not assign a research topic/question

Geography Capstone Course

This course is offered to Geography MA students who have completed, or are expected to complete, all required courses for the degree by the session this course is taken. This geography capstone course builds upon program completed work that allows for the student to apply learned concepts to real-world geographic problems while building upon their professional tools to further their careers. Students will complete a professional portfolio of work that includes a written report and an oral presentation.

Students must earn a grade of B or better to be used toward the MA degree.

Thesis

A thesis is an individual student effort; a creative, scholarly work developed from independent research. The research includes a literature review to delineate a problem or gap in knowledge, statement of objectives, formulation of hypotheses, explanation of methods, collection and analysis of data, report of results, discussion of conclusions, and an abstract.

Thesis results must be: 1) presented orally in a public forum to the faculty and students, 2) presented in written format, and 3) potentially publishable in a peer-reviewed journal.

Students should first identify a research question and a core SGSUP faculty advisor (i.e., a tenured or tenure track faculty member with at least 50% appointment or tenure home in SGSUP) to serve as thesis chair or co-chair. Faculty with less than 50% appointment may be authorized on a case-by-case basis by the Director. SGSUP affiliate faculty and members with no affiliation with SGSUP may be endorsed to serve as co-chair but not chair. If a SGSUP affiliate faculty member or non-SGSUP member is selected as co-chair, the other co-chair must be a core SGSUP faculty member.

It is the responsibility of the student to recruit two other faculty members who can serve on the supervisory committee. At least 50% of the committee must be from within the School of Geographical Sciences and Urban Planning. This may require adding a fourth committee member. Faculty categories that count towards this 50% requirement include: the core SGSUP faculty (as defined above), teaching professors, research faculty, clinical faculty, emeriti faculty, and professors of practice at the rank of assistant, associate, or full. Other faculty categories may be authorized on a case-by-case basis by the Director. At least three committee members must hold a PhD or other terminal degree.

Non-SGSUP committee members may be approved to serve on a supervisory committee with justification. Students electing to have Non-SGSUP members, including those from outside of ASU, must submit the External Committee Member Request form for each outside member. The endorsement of non-SGSUP committee members is done on a one-time, individual basis (i.e., per student). This process can take a week or more to complete, so the early endorsement of members is encouraged to avoid potentially delaying the start of milestones.
The supervisory committee is not officially established until the student’s iPOS is completed and approved by the Graduate College. It is the responsibility of the student to complete the iPOS. This will require listing each supervisory committee member in the iPOS and ensuring all members are endorsed to serve their respective roles as Graduate Faculty. Until the iPOS has been approved by the Graduate College, the student and committee cannot schedule the final defense since the committee has not yet been formalized.

The committee is expected to help the student focus on a topic that meets the student’s academic goals and is feasible. The student must develop a thesis proposal, which summarizes the research problem and approach. The student then submits the thesis proposal to the thesis chair(s), ideally by the late spring of the first year. In the event a student’s summer research/professional work has the potential of becoming a thesis, a student may submit a proposal no later than the second week of September in the fall semester.

Students must complete or be actively completing all non-thesis coursework and resolve all incomplete grades before the oral defense. The student’s thesis committee reviews the thesis manuscript. It must meet the committee’s standards for quality, accuracy, and scope. Upon approval of the thesis manuscript by the supervisory committee, the student will schedule an oral defense of the completed thesis. The student should adhere to all Graduate College procedures and deadlines for scheduling the defense and submitting the completed thesis.

Geography (PhD)

About

The Geography (PhD) program offers a path to building the skills, knowledge and aptitudes needed for a career focused on research or post-secondary teaching in geographical sciences. In addition to innovative coursework, graduate students also have opportunities to work with exceptional faculty on interesting and diverse research projects.

The program admits students who have completed a master’s degree while also offering an option for students with strong potential to enter the PhD program directly after completing a bachelors’ degree. Students entering directly from an undergraduate degree program can elect to earn the Geography MA in passing.

Faculty and graduate students focus their research in one of four broad interdisciplinary themes:

- Computational Spatial Science
- Place, Identities and Culture
- Earth Systems and Climate Science
- Sustainability Science and Studies

Geography (PhD) Application Instructions

Geography (PhD) Admission FAQs
Curriculum

Entering with a master’s degree:

The Geography (PhD) degree requires a minimum of 54 credit hours taken at ASU, completion of the Research Requirement, completion of comprehensive examination, and defense of doctoral prospectus and dissertation. Students should apply thirty (30) credit hours from the previously awarded master’s degree toward their doctoral Plan of Study, for a total of 84 earned credit hours.

The PhD program is designed to be completed in four years when entering with a master’s degree; this includes the final milestone of defending the dissertation and the requirements associated with this step.

Entering without a master’s degree:

The Geography (PhD) degree requires a minimum of 84 credit hours, completion of the Research Requirement, completion of comprehensive examination, and defense of doctoral prospectus and dissertation.

The PhD program is designed to be completed in five years when entering without a master’s degree; this includes the final milestone of defending the dissertation and the requirements associated with this step.

Total Master’s Degree Credit Hours (entering with master’s degree) 30

Total Credit Hours Required for Geography (PhD) 84

*GCU 529 may be waived and substituted with an alternate course, subject to approval by the Associate Director of Graduate Programs. Please submit the Course Waiver Form.

¹GCU 529 is a required course for the Master of Arts in Passing (MIP). Students entering the program without a master’s degree, who are planning to apply for the MIP, may not waive GCU 529.
Electives

This program requires some electives to be taken from a pre-approved list for each category identified (i.e., Methods & Statistics, Skills, and Specialization). The approved lists are available on the Plans of Study and Handbook webpage, in the Approved Electives and Suggested Course Lists section. Blanket credit hours from a prior master’s degree shall not be applied towards the Methods or Statistics, Skills, and Specialization elective requirements without justification and approval from the Associate Director of Graduate Programs.

For all other elective coursework, any graduate level GCU, Gis, GPH, or PUP course may be taken; this includes Research and Reading & Conference credits.

Interdisciplinary courses may be taken but must be approved by the Associate Director of Graduate Programs. Submit the Petition for Transfer or Interdisciplinary Elective Courses form to request approval. A maximum of six (6) credits of 400-level coursework may be included in the plan of study.

Use the Geography (PhD) Plan of Study to assist in planning coursework.

Supervisory Committee Composition

In nearly all instances, doctoral students will have a faculty advisor/mentor established at the time of admission. However, this can change during the time of the student’s graduate career. Students work with their faculty advisor to map out their entire degree progression. Students are encouraged to consult with their advisor prior to registering for classes each semester to ensure classes will contribute to academic and career goals. Students will also consult their faculty advisor to form a supervisory committee made up of members who can contribute to the student’s research.

Typically, the faculty advisor serves as the supervisory committee chair or as one of the co-chairs. Every PhD supervisory committee should include a chair or co-chair who is a tenured or tenure track faculty member with at least 50% appointment or tenure home in SGSUP (i.e., core SGSUP faculty). Faculty with less than 50% appointment may be authorized on a case-by-case basis by the Director. SGSUP affiliate faculty and members with no affiliation with SGSUP may be endorsed to serve as co-chair but not chair. If a SGSUP affiliate faculty member or non-SGSUP member is selected as co-chair, the other co-chair must be a core SGSUP faculty member.

It is the responsibility of the student to recruit at least two other faculty members who can serve on the supervisory committee. At least 50% of the committee must be from within the School of Geographical Sciences and Urban Planning. This may require adding a fourth committee member. Faculty categories that count towards this 50% requirement include: the core SGSUP faculty (as defined above), teaching professors, research faculty, clinical faculty, emeriti faculty, and professors of practice at the rank of assistant, associate, or full. Other faculty categories may be authorized on a case-by-case basis by the Director. At least three committee members must hold a PhD or other terminal degree.

Non-SGSUP committee members may be approved to serve on a supervisory committee with justification. Students electing to have Non-SGSUP members, including those from outside of ASU, must submit the External Committee Member Request form for each outside member. The endorsement of non-SGSUP committee members is done on a one-time, individual basis (i.e., per student). This process can take a
week or more to complete, so the early endorsement of members is encouraged to avoid potentially delaying the start of milestones.

The supervisory committee is not officially established until the student’s iPOS is completed and approved by the Graduate College. It is the responsibility of the student to complete the iPOS. This will require listing each supervisory committee member in the iPOS and ensuring all members are endorsed to serve their respective roles as Graduate Faculty. Until the iPOS has been approved by the Graduate College, the student and committee cannot move forward with the comprehensive exam, prospectus/proposal defense, and final defense since the committee has not yet been formalized.

Sequence & Timeline

The following is the recommended course sequence and timeline of milestones for the Geography (PhD) program. Work with faculty (mentor, committee chair or supervisory committee) to determine which classes to take in order to complete the degree beyond the core required courses. Supervisory committee members should be selected by the end of the second semester (PhD students with a master’s degree) or by the end of the fourth semester (PhD without a master’s degree).

</table>
Dissertation credits may be taken in any combination that adds up to twelve (12), but students are recommended to take them in the final year of the program. Students should consult with their faculty advisor prior to enrolling in dissertation.

Research Requirement

The Research Requirement should be completed by the end of the 4th semester. There are two options for fulfilling this requirement: Research Examination (RE); or Submitted Paper (SP). Students should discuss with their faculty advisor which option is best suited to their specialization and overall research interests.

Research Examination (RE) Option

The research examination assesses the ability to do independent research. PhD students who choose to do the research exam will prepare a statement of their area of specialization in geography and complete an intensive two-week research project culminating in a written paper, administered by the student's supervisory committee. The examination is appraised on the ability to:

- refine and hone a question into a manageable research problem
- couch the research problem in appropriate literature(s)
- acquire, organize, and synthesize relevant field information and data
- demonstrate technical competence in geographic skills
- express ideas, concepts, and lines of argumentation through clear, effective writing

One re-examination may be permitted pending approval by the examining committee and the School’s Director.

Submitted Paper (SP) Option

The submitted (or published) paper option requires that the student submit a paper meeting the following requirements:

- first-authored manuscript
- in English
- submitted to a peer-reviewed journal (not a book chapter or conference proceeding)
- prepared in accordance with the journal’s requirements
- Reviewed and approved by the student’s advisor

Any previously published paper meeting all requirements can satisfy the SP option. This includes papers written at another school or university, co-authored with non-ASU authors, or based on a master’s thesis completed elsewhere.

Reporting Completion of the Research Requirement

Submit the Research Requirement Results form; students will need faculty supervisor’s name and email address in order to initiate the document. For the SP option, students must upload a PDF copy of the document. Once the chair signs, the results will be sent to the graduate support team for reporting to the Graduate College.

Master of Arts in Passing (MIP)

Doctoral students can earn a Master of Arts (MA) in Geography en route to their PhD. Requirements
consist of 30 credits of coursework already taken as part of the doctoral curriculum and completion of the Research Requirement.

Required courses for Master’s in Passing:

<table>
<thead>
<tr>
<th>COURSE</th>

</tr>
<tr>
<td></td>
<td>Elective coursework/research hours</td>
<td>24</td>
</tr>
<tr>
<td></td>
<td><strong>Total</strong></td>
<td><strong>30</strong></td>
</tr>
</tbody>
</table>

Students with any blanket credit hours from a previously awarded master’s degree on their iPOS are not eligible.

Procedure

- Submit doctoral iPOS.
- After iPOS is approved, request the Master’s in Passing from the graduate support team. The request should be submitted once the student has completed or enrolled in 30 credits toward the MIP and reported completion of the Research Requirement.
- Graduate College reviews and approves MIP requests and contacts students with next steps.
  - The student must initiate a separate iPOS for the MIP.
  - MIP iPOS should only list completed and graded coursework (see list above).
- After MIP iPOS is approved by Graduate College, the student must apply for graduation from the MIP program.
  - The student must be enrolled during the term in which they intend to graduate, including summer.
  - Master’s in passing degrees are awarded at the end of the semester for which they applied.
  - Students earning the MIP are permitted to participate in commencement activities and must follow Graduate College and The College procedures accordingly.

Comprehensive Exam

The Comprehensive Exam should be completed by the end of the fourth semester (if entering with a master’s degree) or the end of the sixth semester (if entering without a master’s degree). To take the comprehensive exam, the student must have an approved iPOS by the Graduate College.

Prior to the exam, the student should also have completed the Research Requirement and completed or be actively completing all non-dissertation coursework. The Associate Director of Graduate Programs may provide exceptions on a case-by-case basis.
Written Exam

Students take a written comprehensive exam intended to assess their mastery of geographic thought and methods, and their field of specialization. The comprehensive examination is administered by the student’s supervisory committee and consists of essay questions posed by each committee member, informed by a research statement provided by the student. The questions may have multiple parts and may be specifically related to the member’s discipline.

**Two options to satisfy the comprehensive examination:**

- An eight-hour "closed book" exam
- A three-day take-home exam

The essay question’s length and complexity will vary depending on which option is taken. The student’s supervisory committee has discretion on how the exam is administered and conducted.

Oral Exam

After approval by the supervisory committee of the written comprehensive exam, students will have an oral exam intended to test a student’s mastery of geographic thought and methods and area of specialization. The oral exam will be based on the written portion of the exam, and students will be expected to be able to articulate and clarify the content of the written component. The oral exam is an assessment of whether a student is ready to participate in scholarly discussions, to proceed towards candidacy, and to submit a dissertation proposal.

Students that fail to pass the oral exam will be given a second and final opportunity for an additional oral exam. A student that fails to pass the second oral exam will be recommended for dismissal from the PhD program.

Reporting completion of the Comprehensive Exam

Submit the Comprehensive Exam Results form; students will need committee members’ names and email addresses in order to initiate the document. Once the chair signs, the next committee member should sign, then the next, and so forth. Finally, the graduate support team will report the results to the Graduate College. In the event the committee requires the student to make revisions, the form should not be submitted until the committee determines that the exam is complete (i.e., the committee determines that they are ready to input the results as pass or fail).

Dissertation Proposal/Prospectus

After passing the comprehensive exam, the student is required to submit a written dissertation proposal to the supervisory committee. As part of the dissertation proposal, the student is required to submit a publication plan (including research question(s) posed and motivation, assumptions made and methods employed, and anticipated time to completion) indicating the strategy for completing publishable papers, intended for the peer-review literature, from the dissertation. Upon successful defense of the proposal, the student advances to candidacy for the PhD.

Students must complete or be actively completing all non-dissertation coursework, completed all examination requirements, and resolved all incomplete grades (other than PhD research credit hours) before the oral examination.
The dissertation proposal defense should be completed by the end of the fifth semester (if entering with a master’s degree) or the end of the seventh semester (if entering without a master’s degree), or within six months of completing the comprehensive exam.

Scheduling the Proposal/Prospectus Defense

Consult with your supervisory committee members to select the proposal defense day and time. Committee members may attend the defense remotely if necessary. The student is responsible for coordinating any equipment or technology required to accommodate this. Visit SGSUP Room Reservations to request a room for the defense. Include set-up and break-down time in the reservation request. After the room is confirmed, submit the Schedule Prospectus/Proposal Defense form.

Reporting completion of the Proposal/Prospectus

Submit the Prospectus Defense Results form; students will need committee members’ names and email addresses in order to initiate the document. Once the chair signs, the next committee member should sign, then the next, and so forth. Finally, the graduate support team will report the results to the Graduate College.

Dissertation Defense

The dissertation for a PhD in Geography may take the form of a single monograph or three article-length papers. This is to be decided in consultation with the supervisory committee members. For the three article-length papers option, the research papers:

- Should be led by the student (generally reflected by the first authorship of the student)
- Should have journal article quality as determined by the student’s committee
- Do not need to be submitted for publication or published to be considered complete
- Should include a comprehensive introduction and conclusions chapters that tie the three papers together (see here)
- Cannot include a paper that was applied towards a prior degree

Upon approval of the dissertation by the supervisory committee, the student will schedule an oral defense of the completed dissertation. The student should adhere to all Graduate College procedures and deadlines for scheduling the defense and submitting the completed dissertation.

Performance and Annual Review

To ensure that PhD students are making progress towards their degree in a timely manner, and to ensure the student’s responsibilities are being met, SGSUP’s Graduate Committee, the student’s faculty advisor and any RA/TA faculty supervisors will review the student’s progress annually. The Annual Review is an opportunity to address any extenuating circumstances that may contribute to delays in completing milestones. Students must work with their faculty advisor to develop a plan and timeline for getting back on track and include this in the Annual Review. Reviews are conducted every spring; SGSUP’s Graduate Services Support team will send instructions and deadlines to students at the appropriate time.

Unsatisfactory reviews or failure to submit the annual review may result in a written warning. Refer to Probation, Remediation, and Dismissal for details.
Urban and Environmental Planning (MUEP)

Mission Statement

The Master of Urban and Environmental Planning (MUEP) program’s mission is to improve public wellbeing by providing the knowledge and tools needed by professional planners to shape places that are responsive to climate change and promote the health and prosperity of diverse communities.

About

The on-campus MUEP program is accredited by the Planning Accreditation Board. It is an interdisciplinary, professional degree designed to prepare students for leadership roles in planning in the public, private, and non-profit sectors. The curriculum includes a common core of required courses that provide linkage between knowledge and practice and fundamental theories and skills.

As active scholars and teachers in an accredited planning program, our faculty have a wide range of interests and expertise, including in the areas of:

- climate change
- disasters and resilience
- environmental planning
- housing and community development
- infrastructure planning
- international development
- public engagement
- the sharing economy
- smart cities
- social equity
- sustainability
- transportation and land use

Faculty research and teaching interests especially focus on the following broad interdisciplinary topical areas:

- City Building and Urban Structure
- Environmental and Resiliency Planning
- Spatial Analytics and Smart Cities
- Housing, Neighborhoods, and Community Development
- Transportation Planning and Policy

The MUEP program offers a unique opportunity to integrate urban and environmental aspects of planning in a rapidly developing metropolitan area. Individual practical experience in planning is provided through an optional internship program and applied research. In addition to the planning faculty, the program is enriched by the interdisciplinary participation of faculty from other academic units of the university and leading planning practitioners from the Phoenix area.

For more information on outcomes, certification, and employment data for MUEP graduates, visit MUEP Public Information.
# Admission

<table>
<thead>
<tr>
<th>Application Deadline (Immersion)</th>
<th>January 15 priority deadline for funding consideration. Applications received after the priority deadline will be considered on a rolling basis until the program is full or up until the start of the fall semester (whichever comes first).</th>
</tr>
</thead>
<tbody>
<tr>
<td>Application Deadline (Online)</td>
<td>July 1 (fall admission)</td>
</tr>
</tbody>
</table>

**Application Materials**
- Graduate Admission [online application](#)
- Personal Statement
- Resume
- Official undergraduate transcript
- Three (3) letters of recommendation
- [English Proficiency](#) for non-native English speakers ([TOEFL](#), [IELTS](#), or [PTE](#))

The GRE is not required for admission into the MUEP program. However, prospective students may submit GRE scores if they feel it will strengthen their application. Examples of situations in which applicants may choose to submit GRE scores include:

- Returning students (more than 5 years after completing undergraduate degree)
- Cumulative GPA is between 2.5 and 3.0
- Bachelor’s degree in unrelated field

[Urban and Environmental Planning (MUEP) Application Instructions](#)
[Urban and Environmental Planning (MUEP) Admission FAQs](#)

## Campus Transferring Policy

Students are not permitted to change their campus from Tempe to Online or Online to Tempe without strong justification and approval from the Associate Director of Planning. Students looking to transfer must be in good academic standing. Transferring to another campus will require reapplying to the program with the new campus selected.
Curriculum

The MUEP degree requires a minimum of 47 credit hours and completion of a culminating experience (see below for additional details).

The MUEP degree is designed to be completed within two years; this includes the final milestone of completing the selected culminating experience. Part-time enrollment is permitted for online MUEP students; part-time enrollment for on-campus students may be permitted on a case-by-case basis.

Total Required Credit Hours 32 or 33

Total Elective Credit Hours 14 or 15

Total Credit Hours Required for Urban and Environmental Planning (MUEP) 47

*PUP 542 may be waived for students who took PUP 442 as part of their ASU undergraduate coursework. Submit the Course Waiver form to check for waiver eligibility. A substitute course for PUP 542 must be chosen from the Approved Environmental Planning Course list. Substitution of this course is only authorized if PUP 442 was completed prior to admission into this graduate program.

**PUP 576 may be waived with sufficient GIS experience. A formal education (degree, certificate, minor) in GIS or specific ASU undergraduate coursework (GIS 211 and/or GIS 311) automatically qualifies students for the waiver. Any other circumstances (other coursework, internship, volunteer, or work experience) must be petitioned. Submit the Course Waiver form to check for waiver eligibility. A substitute course for PUP 576 must be chosen from the Approved Method Courses list. Substitution of this course is only authorized if the demonstrated GIS experience was from prior to admission into this graduate program.

***PUP 580 Planning Workshop is the default culminating experience. Students may choose an alternative option in consultation with an MUEP Program Coordinator or their faculty advisor. ASU Online MUEP students must complete PUP 580 Planning Workshop as their culminating experience.
Electives
At least 14 credit hours of additional elective coursework and/or research is required. Any graduate level GCU, GIS, GPH, or PUP course may be taken as an elective. Interdisciplinary courses may be taken, but must be approved by the school if they are not on the Approved MUEP Electives list. Submit the Petition for Transfer or Interdisciplinary Elective Courses form to request approval. A maximum of 6 credits of 400-level coursework may be included in the plan of study but must be approved by the Associate Director of Planning. Use the MUEP Plan of Study to assist in planning coursework.

Sequence & Timeline
The following is the recommended course sequence for the MUEP program. Students should work with the MUEP Program Coordinator, faculty, and the academic advisors to determine which classes to take in order to complete the degree beyond the core required courses. Students wanting to specialize in one of the five topical areas should work with an MUEP Program Coordinator. Most classes are offered only once per year (Fall only or Spring only). If students need to deviate from the below plan, contact the MUEP Program Coordinator to review options.

*On campus students wishing to participate in NEURUS research exchange program in Year Two are required to take PUP 642 in their first semester. Information on NEURUS is available at https://sgsup.asu.edu/student-life/study-abroad. If PUP 642 is not taken during the first semester, it will need to be taken in the third semester to stay on the two-year track.

Concurrent Degrees
Three concurrent degree programs combining the Master in Urban and Environmental Planning (MUEP), and the Master of Sustainability Solutions (MSUS), Master of Public Policy (MPP), or Master of Public
Administration (MPA) are available. There is compelling evidence of the critical importance of incorporating sustainability or public administration/policy into planning education, curricula and practice. A demonstrated demand for a concurrent program where a student may obtain two master’s degrees in planning and sustainability or public administration/policy in three years has resulted in this offering.

Students wishing to apply for the concurrent degree in Planning and Sustainability or Public Administration/Policy will have to apply to and be accepted by both programs. After being admitted, students must inform both programs that they wish to enter the concurrent degree program.

Each school will send a letter to Graduate College informing them that the student is admitted to their degree program and wishes to enter the concurrent degree program. Graduate College will then register the student in the respective concurrent degree program.

For more information about concurrent degree programs:

**MUEP/MSUS**
- Website
- MSUS Advising
- Plan of Study

**MUEP/MPA**
- Website
- MPA Advising
- Plan of Study

**MUEP/MPP**
- Website
- MPP Advising
- Plan of Study

For non-established concurrent pathways, students are responsible for planning the sequencing and scheduling of courses required for the completion of both degrees. This entails coordinating with academic advisors from both programs to ensure that the coursework aligns with the requirements of each degree and that any potential conflicts are addressed. Students must demonstrate the ability to manage a demanding workload and maintain satisfactory progress towards both degrees. Additionally, they must adhere to the regulations and deadlines set forth by each individual program. While the flexibility of pursuing concurrent degrees offers unique opportunities for interdisciplinary learning and personal academic enrichment, it necessitates a high level of self-discipline and organization on the part of the student to successfully navigate through the complexities of dual-degree completion.

**Accelerated Master’s Degree**

The School of Geographical Sciences and Urban Planning’s fast track approach allows highly qualified ASU students who are finishing their undergraduate degrees to be enrolled simultaneously in the Master of Urban and Environmental Planning degree program. Students may share 18 credits between the undergraduate and graduate degrees. Students must apply for preliminary admission in the spring of their junior year.

**Accelerated degree pathways**
- BS Planning + MUEP
- BA/BS Geography + MUEP
- BS Geographic Information Sciences + MUEP
MUEP Advising Requirement

MUEP students are required to meet with the MUEP Program Coordinator virtually or in-person at least once after completing 12 credits towards the program (equivalent to the start of the second (2nd) semester for a full-time student) and after completing 24 credits towards the program (equivalent to the start of the third (3rd) semester for a full-time student). In the event a MUEP student takes a leave of absence (LOA), medical withdrawal, or other brief absence from the program, the student is required to meet with an MUEP Program Coordinator at least once during the next fall or spring semester in which they continue with the program. Failure to meet the requirements outlined in this section may result in a written warning or academic probation. To schedule an appointment with the MUEP Program Coordinator, please refer to the SGSUP Graduate Advising webpage.

Culminating Experience Options

The Planning Workshop is the default culminating experience for MUEP students. Students preferring to pursue an individualized culminating experience project (applied project, thesis) must be aware that:

- Individualized culminating experiences require significant effort, initiative, and discipline by the student
- Students are responsible for identifying a client/project or research question
- Faculty advisors will supervise the project or thesis; they will not match the student with a client/project or assign a research topic/question

Refer to How to: Choose a Culminating Experience for assistance, or contact the MUEP Program Coordinator for advising.

PUP 580 Planning Workshop

The course is offered to second year MUEP students who have completed all or most of the required courses for the MUEP degree. This capstone project immerses students in a real-world planning context to provide an integrative academic and professional experience. The final products for the course typically consist of a professional report and presentation. The instructor will stress individual accountability for all MUEP students involved in the planning workshop although group work is expected and crucial to the development of the project. The Planning Workshop is offered only in the spring semester and should be taken in the student’s last semester of study. Students must earn a grade of B or better to pass the Planning Workshop.

PUP 593 Applied Project

The applied project involves the application of advanced planning methodologies to a specific, real-world planning problem and is prepared for a planning-related organization (the client). An applied project typically involves defining a problem; reviewing, selecting, and applying appropriate methodologies to address the problem; and identifying a solution or recommendations, if applicable. The major objective of the applied project is to give students the opportunity to develop their planning problem solving abilities in a real-world setting.
Students contemplating an applied project should first identify a potential project and client. The student will then select a supervisory committee. The committee is composed of at least three advisors, two of whom must be regular ASU faculty members, with a member from the planning faculty serving as chair or co-chair, and at least one planning professional from the client’s office. The committee is expected to help the student focus on a topic that meets the student's professional goals and is feasible. Both the student and the committee must clearly understand their mutual expectations with respect to the amount of work to be done. Students must submit an Applied Project Scope Statement prior to beginning work on the applied project.

The student is responsible for knowing and meeting all deadlines, submitting the applicable paperwork, establishing a committee, and preparing the project in the proper format, as determined by the client. The student will enroll in the PUP 593 Applied Project course under his/her committee chair during the last semester of the program. Normally, the project will involve five credit hours during the final semester of meeting the MUEP degree requirements. Students contemplating an applied project should be aware that this option may require a time commitment beyond that of the more typical course requirements. The applied project is always an individual student effort and solely authored by the student. All fees and expenses associated with the applied project are the student’s responsibility. Students must earn a grade of B or better to pass the Applied Project. Applied projects will be evaluated using the Applied Project Assessment Rubric.

**Applied Project Scoping Statement Requirement**

Students must have an Applied Project Scoping Statement signed by all committee members on file to proceed with an applied project by the time they 1) have earned 75% of the credits required for the MUEP and 2) expect to enroll in their final semester, including the culminating experience credits (PUP 593). Students who do not meet these criteria must 1) change their Plan of Study degree requirements to PUP 580 Planning Workshop culminating experience and 2) enroll in the next semester that it is offered.

**Satisfactory Progress Requirement**

Students will have one year to make satisfactory progress on their culminating experience after their signed Applied Project Scoping Statement is filed. If satisfactory progress is not made within one year, then the student must 1) change their Plan of Study degree requirements to PUP 580 Planning Workshop culminating experience and 2) enroll the next semester that it is offered.

A student achieves satisfactory progress by:

- Submitting all deliverables by deadlines mutually agreed upon by the committee and student;
- Addressing committee feedback and/or requested revisions at each project stage;
- Maintaining professional and timely communication with the committee regarding project status, including priorities, successes, setbacks, and challenges; and
- Attending project status check-ins as required by the committee.

**Exceptions**

In exceptional circumstances, a student may request a one-semester extension for 1) completion of their Applied Project Scoping Statement or 2) achievement of satisfactory progress, with approval granted by...
the Associate Director of Planning. Exceptions include, but are not limited to, experiencing illness or disability, death of a loved one, or increased caretaking responsibilities.

**PUP 599 Thesis**

A thesis is an individual student effort; a creative, scholarly work developed from independent research. The research includes a literature review to delineate a problem or gap in knowledge, statement of objectives, formulation of hypotheses, explanation of methods, collection and analysis of data, report of results, discussion of conclusions, and an abstract. The major objective of the thesis is to provide students the opportunity to develop their creative abilities in one or more of the following areas:

- Defining and understanding urban planning problems or opportunities;
- Developing new knowledge and planning methods or strategies to address urban planning problems and opportunities;
- Understanding the structure and function of urban systems.

Thesis results must be: 1) presented orally in a public forum to the faculty and students, 2) presented in written format, and 3) potentially publishable in a peer-reviewed journal.

**Students contemplating a thesis should first identify a research question and a planning faculty advisor to serve as thesis chair.** It is the responsibility of the student to recruit two other planning faculty members who can serve on the supervisory committee. Non-SGSUP committee members may be approved with justification, but at least 50% of the committee must be from within the school. The committee is expected to help the student focus on a topic that meets the student's academic goals and is feasible. The student must develop a thesis proposal, which summarizes the research problem and approach. The student then submits the **Thesis Proposal** to the thesis chair, ideally by the late spring of the first year. If a student's summer research/professional work has the potential of becoming a thesis, a student may submit a proposal no later than the second week of September in the fall semester.

Students must complete or be actively completing all non-thesis coursework and resolve all incomplete grades before the oral defense. The student's thesis committee reviews the thesis manuscript. It must meet the committee's standards for quality, accuracy, and scope. Upon approval of the thesis manuscript by the supervisory committee, the student will schedule an oral defense of the completed thesis. The student should adhere to all **Graduate College** procedures and deadlines for scheduling the defense and submitting the completed thesis. The final thesis will be evaluated using the **Thesis Assessment Rubric**.

**Thesis Scoping Statement Requirement**
Students must have a Thesis Proposal signed by all committee members on file to proceed with a thesis by the time they 1) have earned 75% of the credits required for the MUEP and 2) expect to enroll in their final semester, including the culminating experience credits (PUP 599). Students who do not meet these criteria must 1) change their Plan of Study degree requirements to PUP 580 Planning Workshop culminating experience and 2) enroll in the next semester that it is offered.

**Satisfactory Progress Requirement**
Students will have one year to make satisfactory progress on their culminating experience after their signed Thesis Proposal is filed. If satisfactory progress is not made within one year, then the student must 1) change their Plan of Study degree requirements to PUP 580 Planning Workshop culminating experience and 2) enroll the next semester that it is offered.

A student achieves satisfactory progress by:
- Submitting all deliverables by deadlines mutually agreed upon by the committee and student;
- Addressing committee feedback and/or requested revisions at each project stage;
- Maintaining professional and timely communication with the committee regarding project status, including priorities, successes, setbacks, and challenges; and
- Attending project status check-ins as required by the committee.

Exceptions
In exceptional circumstances, a student may request a one-semester extension for 1) completion of their Thesis Proposal or 2) achievement of satisfactory progress, with approval granted by the Associate Director of Planning. Exceptions include, but are not limited to, experiencing illness or disability, death of a loved one, or increased caretaking responsibilities.

**MUEP Spring Showcase**
Each spring, the MUEP program holds a showcase to present the culminating experience work from students graduating that spring/summer. Students completing the Planning Workshop, Applied Project, or Thesis are required to participate and present their final work as part of their culminating experience. Online MUEP students will coordinate with the course instructor regarding potential participation. The event includes presentations from each student project and is an opportunity to celebrate the work of our graduating MUEP students. Attendees for this event include current MUEP students, faculty, project committees, and the Planning Advisory Board.
Urban Planning (PhD)

About

The Urban Planning (PhD) program will educate scholars for positions in leading universities, research institutions, nongovernmental organizations, international multilateral institutions, national, state, and local governments, and high-level consulting firms. The program will provide a solid foundation for undertaking research in planning, urbanism, urban design and urban sustainability.

While topics and methods will be wide-ranging and will include spatial, theoretical, and urban design inquiry, the focus of the doctorate will be on the built environment, its problems and potential solutions that improve the quality of life of urban residents.

Research Opportunities

All graduate students benefit from a wide variety of course work and research opportunities in five broad interdisciplinary themes that span the expertise of the faculty within the School of Geographical Sciences and Urban Planning:

- City Building and Urban Structure
- Environmental and Resiliency Planning
- Spatial Analytics and Smart Cities
- Housing, Neighborhoods, and Community Development
- Transportation Planning and Policy

Partnerships

The planning program works closely with the School of Sustainability, and many of our faculty have joint appointments in that school. We also have close relationships with many of the communities in the Phoenix metropolitan area.

Urban Planning (PhD) Application Instructions

Urban Planning (PhD) Admission FAQs
Curriculum

The Urban Planning (PhD) degree requires a minimum of 54 credit hours taken at ASU, completion of written and oral comprehensive examination, and defense of doctoral prospectus and dissertation. Students should apply up to thirty (30) credit hours from a previously awarded master’s degree toward their doctoral Plan of Study, for a total of 84 earned credit hours.

The PhD program is designed to be completed in four years; this includes the final milestone of defending the dissertation and the requirements associated with this step.

Total Required Credit Hours 20
Total Elective Credit Hours 34
Total Master’s Degree Credit Hours 30

Total Credit Hours Required for Urban Planning (PhD) 84

Electives

At least 34 credit hours of additional elective coursework and/or research is required to meet the minimum number of hours. Any graduate level GCU, GIS, GPH, or PUP course may be taken as elective; this includes Research and Reading & Conference credits. Suggested lists are available at the Plans of Study and Handbook webpage, in the Approved Electives and Suggested Course Lists section.

Interdisciplinary courses may be taken but must be approved by the Associate Director of Graduate Programs. Submit the Petition for Transfer or Interdisciplinary Elective Courses form to request approval.

Use the Urban Planning (PhD) Plan of Study to assist in planning coursework.

Supervisory Committee Composition

In nearly all instances, doctoral students will have a faculty advisor/mentor established at the time of admission. However, this can change during the time of the student’s graduate career. Students work with their faculty advisor to map out their entire degree progression. Students are encouraged to consult with their advisor prior to registering for classes each semester to ensure classes will contribute to academic and career goals. Students will also consult their faculty advisor to form a supervisory committee made up of members who can contribute to the student’s research.
Typically, the faculty advisor serves as the supervisory committee chair or as one of the co-chairs. Every PhD supervisory committee should include a chair or co-chair who is a tenured or tenure track faculty member with at least 50% appointment or tenure home in SGSUP (i.e., core SGSUP faculty). Faculty with less than 50% appointment may be authorized on a case-by-case basis by the Director. SGSUP affiliate faculty and members with no affiliation with SGSUP may be endorsed to serve as co-chair but not chair. If a SGSUP affiliate faculty member or Non-SGSUP member is selected as co-chair, the other co-chair must be a core SGSUP faculty member.

It is the responsibility of the student to recruit at least two other faculty members who can serve on the supervisory committee. At least 50% of the committee must be from within the School of Geographical Sciences and Urban Planning. This may require adding a fourth committee member. Faculty categories that count towards this 50% requirement include: the core SGSUP faculty (as defined above), teaching professors, research faculty, clinical faculty, emeriti faculty, and professors of practice at the rank of assistant, associate, or full. Other faculty categories may be authorized on a case-by-case basis by the Director. At least three committee members must hold a PhD or other terminal degree.

Non-SGSUP committee members may be approved to serve on a supervisory committee with justification. Students electing to have Non-SGSUP members, including those from outside of ASU, must submit the External Committee Member Request form for each outside member. The endorsement of Non-SGSUP committee members is done on a one-time, individual basis (i.e. per student). This process can take a week or more to complete, so the early endorsement of members is encouraged to avoid potentially delaying the start of milestones.

The supervisory committee is not officially established until the student’s iPOS is completed and approved by the Graduate College. It is the responsibility of the student to complete the iPOS. This will require listing each supervisory committee member in the iPOS and ensuring all members are endorsed to serve their respective roles as Graduate Faculty. Until the iPOS has been approved by the Graduate College, the student and committee cannot move forward with the comprehensive exam, prospectus/proposal defense, and final defense since the committee has not yet been formalized.
## Sequence & Timeline

The following is the recommended course sequence and timeline of milestones for the Urban Planning (PhD) program. Work with faculty (mentor, committee chair or supervisory committee) to determine classes to take in order to complete the degree beyond the core required courses. Supervisory committee members should be selected by the end of the second semester.

Dissertation credits may be taken in any combination that adds up to twelve (12), but students are recommended to take them in the final year of the program. Students should consult with their faculty advisor prior to enrolling in dissertation.

### Comprehensive Exam

The Comprehensive Exam should be completed by the end of the fourth semester. To take the comprehensive exam, the student must have an approved iPOS by the Graduate College.

### Written Exam

The written portion of the comprehensive exam consists of three papers. The papers are intended to
demonstrate advanced knowledge of the planning field. The written exam is not focused on the student’s dissertation topic but is intended to test general knowledge in the student’s general areas of interest. All papers shall be approved by the supervisory committee. The student’s supervisory committee has discretion on how the exam is administered and conducted. The papers shall cover the following three topics:

**Planning Theory**

**Goal:** The goal of this paper is to situate oneself within one of the sub-disciplines of planning and discuss in some detail two areas of specialization within this sub-discipline. To accomplish this, students should:

- demonstrate a deep understanding of the two chosen areas of the literature
- highlight key research problems in these areas
- link his or her own research interests and plans to existing work in these areas, as well as to broader planning problems

To begin, the paper should broadly situate the student’s research interest within a planning sub-discipline and then proceed to spend the majority of the paper discussing the two areas of specialization selected. Towards the close of the paper the student should situate their dissertation interest within the two selected topics. This discussion should not constitute a majority of the paper.

**Length:** 7,500 to 10,000 words

**Sample Prompt:** In consultation with the exam committee, the student will identify key works in each of two areas of specialization within the planning literature to which their research interests pertain. For each area, the student will write a concise discussion of how these works build upon and relate to one another, and identifies key research problems – both those that have been addressed as well as outstanding questions. The paper should conclude with a brief statement of the student’s own research interests and plans, and a discussion of where these fit into the works discussed. This paper should be accompanied by a list of references cited in APA citation format. It is expected that the paper be original material. It may not be composed of reconstituted papers from previous courses.

**Planning Methods**

**Goal:** The goal of this paper is to demonstrate understanding of the research methods used in the student’s areas of specialization indicated in the theory paper submitted in the fourth semester.

**Length:** 5,000 to 6,000 words

**Sample prompt:** In this paper, the student will discuss a research problem in his or her area of specialization, with a focus on identifying and describing at least three methods that have been or could be used to investigate this research problem. The problems and prospects of each method should be discussed, both in general and with specific reference to the research problem at hand. While this may include some discussion of data collection methods, it is expected that the focus will be on methods of data analysis -quantitative and/or qualitative. This paper should be accompanied by a list of references cited in APA citation format. It is expected that the paper be original material. It may not be composed of reconstituted papers from previous courses.

**Substantive Topic**

**Goal:** The purpose of this paper is to demonstrate the ability to conceive and execute a research project
in the student’s chosen area of planning specialization. To accomplish this, the student should:

- Construct a research question
- Summarize prior work pertaining to that research question
- Choose an appropriate dataset for the research question
- Use appropriate methods to answer the question
- Present results
- Discuss conclusions and tie them to existing work in the field

Students who have submitted a manuscript for peer-reviewed publication as the sole or first author have satisfied this requirement, as indicated by a memo from their faculty advisor.

**Length:** 6,500 and 10,000 words

**Sample Prompt:** In this paper, the student will pose a research question, review relevant literature, collect and analyze evidence, explain how the results answer the research question, and conclude with a discussion that includes the implications of the results for planning practice, limitations of the research, and possible next steps. This work should be topically situated in the student’s area of specialization. Tables and figures should be included to present results where appropriate. This paper should be accompanied by a list of references cited in APA citation format.

**Oral Exam**

After approval by the supervisory committee of the written comprehensive exam papers, students will have an oral exam intended to assess a student’s mastery of planning theory, research methods, and area of specialization. The oral exam will be based on the written portion of the exam, and students will be expected to be able to articulate and clarify the content of all three papers. The oral exam is an assessment of whether a student is ready to participate in scholarly discussions, to proceed towards candidacy, and to submit a dissertation proposal.

Students that fail to pass the oral exam will be given a second and final opportunity for an additional oral exam. A student that fails to pass the second oral exam will be recommended for dismissal from the PhD program.

**Reporting completion of the Comprehensive Exam**

Submit the [Comprehensive Exam Results](#) form; students will need committee members’ names and email addresses in order to initiate the document. Once the chair signs, the next committee member should sign, then the next, and so forth. Finally, the graduate support team will report the results to the Graduate College.

**Dissertation Proposal/Prospectus**

After passing the comprehensive exam, the student is required to submit a written dissertation proposal to the supervisory committee. As part of the dissertation proposal, the student is required to submit a publication plan indicating the strategy for completing publishable papers from the dissertation. Upon successful defense of the proposal, the student advances to candidacy for the PhD.
Students must complete or be actively completing all non-dissertation coursework, completed the comprehensive examination requirement, and resolved all incomplete grades (other than PhD research credit hours) before the oral examination.

The dissertation proposal defense should be completed by the end of the fifth semester, or within six months of the comprehensive exam.

**Scheduling the Proposal/Prospectus defense**

Consult with supervisory committee members to select defense day and time. Committee members may attend the defense remotely if necessary. The student is responsible for coordinating any equipment or technology required to accommodate this. Visit SGSUP Room Reservations and request a room for the defense. Include set-up and break-down time in the reservation request. After the room is confirmed, submit the Schedule Prospectus/Proposal Defense form. The graduate support team will contact the student with the next steps.

**Reporting completion of the Proposal/Prospectus**

Submit the Prospectus Defense Results form; students will need committee members’ names and email addresses in order to initiate the document. Once the chair signs, the next committee member should sign, then the next, and so forth. Finally, the graduate support team will report the results to the Graduate College.

**Dissertation Defense**

The dissertation for a PhD in Urban Planning may take the form of a single monograph or three article-length papers. This is to be decided in consultation with the supervisory committee members. For the three article-length papers option, the research papers:

- Should be led by the student (generally reflected by the first authorship of the student)
- Should have journal article quality as determined by the student’s committee
- Do not need to be submitted or published to be considered complete
- Should include a comprehensive introduction and conclusions chapters that tie the three papers together (see here)
- Cannot include a paper that was applied towards a prior degree

Upon approval of the dissertation by the supervisory committee, the student will schedule an oral defense of the completed dissertation. The student should adhere to all Graduate College procedures and deadlines for scheduling the defense and submitting the completed dissertation.

**Performance and Annual Review**

To ensure that PhD students are making progress towards their degree in a timely manner, and to ensure the student’s responsibilities are being met, the Associate Director, student’s faculty advisor and RA/TA faculty supervisors will review students’ progress annually. The Annual Review is an opportunity to address any extenuating circumstances that may contribute to delays in completing milestones. Students must work with their faculty advisor to develop a plan and timeline for getting back on track and include
this in the Annual Review. Reviews are conducted every spring; the graduate support team will send instructions and deadlines to students at the appropriate time.

Unsatisfactory reviews or failure to submit the annual review may result in a written warning. Refer to Probation, Remediation, and Dismissal for details.
Geographic Information Systems (MAS)

About

The Master of Advanced Study in Geographic Information Systems (MAS-GIS) is a compact one-year non-thesis degree program fostering advanced study in the management and use of GIS technology in public and corporate environments. The degree meets important educational needs of working professionals and recent college graduates seeking to improve their career standing.

The program provides a comprehensive professional degree that balances work in the theoretical aspects of GIS, the technical side of the discipline, and the applications domain. Students are exposed to cutting-edge technology, with a focus on building invaluable problem-solving skills, and the opportunity to work on real-world GIS projects.

Admission

Sequence & Timeline

The following is the recommended course sequence and timeline for the Geographic Information Systems (MAS) program. Students are expected to complete all requirements for the MAS degree in one year. Courses are held in the evenings, and the curriculum is highly adaptable to the work environment; thus, the master's degree is achievable in a one-year period.

About

The Geographic Information Science (PhD) program offers a path to building the skills, knowledge and aptitudes needed for a career focused on research or post-secondary teaching in geographical sciences. In addition to innovative coursework, graduate students also have opportunities to work with exceptional faculty on interesting and diverse research projects.

The program admits students who have completed a master’s degree and offers an option for students with strong potential to enter the PhD program directly after completing a bachelor’s degree.

Faculty and graduate students focus their research in one of our broad interdisciplinary themes:

- Computational Spatial Science
- Earth Systems and Climate Science
- Sustainability Science and Studies
- Transportation Planning and Policy

Curriculum

Entering with a master’s degree:

The Geographic Information Science (PhD) degree requires a minimum of 54 credit hours taken at ASU, completion of the Research Requirement, completion of comprehensive examination, and defense of doctoral prospectus and dissertation. Students should apply thirty (30) credit hours from the previously awarded master’s degree toward their doctoral Plan of Study, for a total of 84 earned credit hours.

The PhD program is designed to be completed in four years when entering with a master’s degree; this includes the final milestone of defending the dissertation and the requirements associated with this step.

Entering without a master’s degree:

The Geographic Information Science (PhD) degree requires a minimum of 84 credit hours, completion of the Research Requirement, completion of comprehensive examination, and defense of doctoral prospectus and dissertation.

The PhD program is designed to be completed in five years when entering without a master’s degree; this includes the final milestone of defending the dissertation and the requirements associated with this step.

Total Elective Credit Hours (entering with master’s degree) AND 25

Total Master’s Degree Credit Hours (entering with master’s degree) 30

Total Credit Hours Required for Geographic Information Science (PhD) 84

Remote sensing

Students should choose a remote sensing course in consultation with faculty advisor. A list of pre-approved courses is available at the Plans of Study and Handbook webpage, in the Approved Electives and Suggested Course Lists section.
Electives

Elective coursework is required to meet the minimum number of hours. Any graduate level GCU, GIS, GPH, or PUP course may be taken as elective; this includes Research and Reading & Conference credits. Suggested lists are available at the Plans of Study and Handbook webpage, in the Approved Electives and Suggested Course Lists section.

Interdisciplinary courses may be taken but must be approved by the Associate Director of Graduate Programs. Submit the Petition for Transfer or Interdisciplinary Elective Courses form to request approval. A maximum of six (6) credits of 400-level coursework may be included in the plan of study.

Use the Geographic Information Science (PhD) Plan of Study to assist in planning coursework.

Supervisory Committee Composition

In nearly all instances, doctoral students will have a faculty advisor/mentor established at the time of admission. However, this can change during the time of the student’s graduate career. Students work with their faculty advisor to map out their entire degree progression. Students are encouraged to consult with their advisor prior to registering for classes each semester to ensure classes will contribute to academic and career goals. Students will also consult their faculty advisor to form a supervisory committee made up of members who can contribute to the student’s research.

Typically, the faculty advisor serves as the supervisory committee chair or as one of the co-chairs. Every PhD supervisory committee should include a chair or co-chair who is a tenured or tenure track faculty member with at least 50% appointment or tenure home in SGSUP (i.e., core SGSUP faculty). Faculty with less than 50% appointment may be authorized on a case-by-case basis by the Director. SGSUP affiliate faculty and members with no affiliation with SGSUP may be endorsed to serve as co-chair but not chair. If a SGSUP affiliate faculty member or Non-SGSUP member is selected as co-chair, the other co-chair must be a core SGSUP faculty member.

It is the responsibility of the student to recruit at least two other faculty members who can serve on the supervisory committee. At least 50% of the committee must be from within the School of Geographical Sciences and Urban Planning. This may require adding a fourth committee member. Faculty categories that count towards this 50% requirement include: the core SGSUP faculty (as defined above), teaching professors, research faculty, clinical faculty, emeriti faculty, and professors of practice at the rank of assistant, associate, or full. Other faculty categories may be authorized on a case-by-case basis by the Director. At least three committee members must hold a PhD or other terminal degree.

Non-SGSUP committee members may be approved to serve on a supervisory committee with justification. Students electing to have Non-SGSUP members, including those from outside of ASU, must submit the External Committee Member Request form for each outside member. The endorsement of Non-SGSUP committee members is done on a one-time, individual basis (i.e. per student). This process can take a week or more to complete, so the early endorsement of members is encouraged to avoid potentially delaying the start of milestones.
The supervisory committee is not officially established until the student’s iPOS is completed and approved by the Graduate College. It is the responsibility of the student to complete the iPOS. This will require listing each supervisory committee member in the iPOS and ensuring all members are endorsed to serve their respective roles as Graduate Faculty. Until the iPOS is approved by the Graduate College, the student and committee cannot move forward with the comprehensive exam, prospectus/proposal defense, and final defense since the committee has not yet been formalized.

Sequence & Timeline

The following is the recommended course sequence and timeline of milestones for the Geographic Information Science (PhD) program. Work with faculty (mentor, committee chair or supervisory committee) to determine classes to take in order to complete the degree beyond the core required courses. Supervisory committee members should be selected by the end of the second semester (PhD students with a master’s degree) or by the end of the fourth semester (PhD without a master’s degree).

Dissertation credits may be taken in any combination that adds up to twelve (12), but students are recommended to take them in the final year of the program. Students should consult with their faculty advisor prior to enrolling in dissertation.
Research Requirement

The Research Requirement should be completed by the end of the 4th semester. There are two options for fulfilling this requirement: Research Examination (RE); or Submitted Paper (SP). Students should discuss with their faculty advisor which option is best suited to their specialization and overall research interests.

Research Examination (RE) Option

The research examination assesses the ability to do independent research. PhD students who choose to do the research exam will prepare a statement of their area of specialization in geographic information science and complete an intensive two-week research project culminating in a written paper, administered by the student’s supervisory committee. The examination is appraised on the ability to:

● refine and hone a question into a manageable research problem
● couch the research problem in appropriate literature(s)
● acquire, organize, and synthesize relevant field information and data
● demonstrate technical competence in geographic skills
● express ideas, concepts, and lines of argumentation through clear, effective writing

One re-examination may be permitted pending approval by the examining committee and the School Director.

Submitted Paper (SP) Option

The submitted (or published) paper option requires that the student submit a paper meeting the following requirements:

● first-authored manuscript
● in English
● submitted to a peer-reviewed journal (not a book chapter or conference proceeding)
● prepared in accordance with the journal’s requirements
● Reviewed and approved by the student’s advisor

Any previously published paper meeting all requirements can satisfy the SP option. This includes papers written at another school or university, co-authored with non-ASU authors, or based on a master’s thesis completed elsewhere.

Reporting Completion of the Research Requirement

Submit the Research Requirement Results form; students will need faculty supervisor’s name and email address in order to initiate the document. For the SP option, students must upload a PDF copy of the document. Once the chair signs, the graduate support team will report the results to the Graduate College.

Master of Science in Passing (MIP)

Doctoral students can earn a Master of Science (MS) in Geographic Information Science en route to their PhD. Requirements consist of 30 credits of coursework already taken as part of the doctoral curriculum and completion of the Research Requirement.

Required courses for Master’s in Passing:

Students with any blanket credit hours from a previously awarded master’s degree on their iPOS are not eligible.

### Procedure

- Submit doctoral iPOS.
- After iPOS is approved, request the Master’s in Passing from graduate support team. The request should be submitted once the student has completed or enrolled in 30 credits toward the MIP and reported completion of the Research Requirement.
- Graduate College reviews and approves MIP requests and contacts students with next steps.
  - The student must initiate a separate iPOS for the MIP.
  - MIP iPOS should only list completed and graded coursework (see list above).
- After MIP iPOS is approved by Graduate College, the student must apply for graduation from the MIP program.
  - The student must be enrolled during the term in which they intend to graduate, including summer.
  - Master’s in passing degrees are awarded at the end of the semester for which they applied.
  - Students earning the MIP are permitted to participate in commencement activities and must follow Graduate College and The College procedures accordingly.
Comprehensive Exam

The Comprehensive Exam should be completed by the end of the fourth semester (if entering with a master’s degree) or the end of the sixth semester (if entering without a master’s degree). To take the comprehensive exam, the student must have an approved iPOS by the Graduate College.

Prior to the exam, the student should also have completed the Research Requirement and completed or be actively completing all non-dissertation coursework. The Associate Director of Graduate Programs may provide exceptions on a case-by-case basis.

Written Exam

Students take a written comprehensive exam intended to assess their mastery of geographic information science thought and methods, and their field of specialization. The comprehensive examination is administered by the student’s supervisory committee and consists of essay questions posed by each committee member, informed by a research statement provided by the student. The questions may have multiple parts and may be specifically related to the member’s discipline.

Two options to satisfy the comprehensive examination:

- An eight-hour "closed book" exam
- A three-day take-home exam

The essay question’s length and complexity will vary depending on which option is taken. The student’s supervisory committee has discretion on how the exam is administered and conducted.

Oral Exam

After approval by the supervisory committee of the written comprehensive exam, students will have an oral exam intended to assess a student’s mastery of geographic information science thought and methods, and area of specialization. The oral exam will be based on the written portion of the exam, and students will be expected to be able to articulate and clarify the content of the written component. The oral exam is an assessment of whether a student is ready to participate in scholarly discussions, to proceed towards candidacy, and to submit a dissertation proposal.

Students that fail to pass the oral exam will be given a second and final opportunity for an additional oral exam. A student that fails to pass the second oral exam will be recommended for dismissal from the PhD program.

Reporting completion of the Comprehensive Exam

Submit the Comprehensive Exam Results form; students will need committee members’ names and email addresses in order to initiate the document. Once the chair signs, the next committee member should sign, then the next, and so forth. Finally, the graduate support team will report the results to the Graduate College. In the event the committee requires the student to make revisions, the form should not be submitted until the committee determines that the exam is complete (i.e., the committee determines that they are ready to input the results as pass or fail).

Dissertation Proposal/Prospectus

After passing the comprehensive exam, the student is required to submit a written dissertation proposal.
to the supervisory committee. As part of the dissertation proposal, the student is required to submit a publication plan (including research question(s) posed and motivation, assumptions made and methods employed, and anticipated time to completion) indicating the strategy for completing publishable papers, intended for the peer-review literature, from the dissertation. Upon successful defense of the proposal, the student advances to candidacy for the PhD.

Students must complete or be actively completing all non-dissertation coursework, completed all examination requirements, and resolved all incomplete grades (other than PhD research credit hours) before the oral examination.

The dissertation proposal defense should be completed by the end of the fifth semester (if entering with a master’s degree) or the end of the seventh semester (if entering without a master’s degree), or within six months of completing the comprehensive exam.

Scheduling the Proposal/Prospectus Defense

Consult with supervisory committee members to select defense day and time. Committee members may attend the defense remotely if necessary. The student is responsible for coordinating any equipment or technology required to accommodate this. Visit SGSUP Room Reservations and request a room for the defense. Include set-up and break-down time in the reservation request. After the room is confirmed, submit the Schedule Prospectus/Proposal Defense form. The graduate support team will contact the student with the next steps.

Reporting Completion of the Proposal/Prospectus

Submit the Prospectus Defense Results form; students will need committee members’ names and email addresses in order to initiate the document. Once the chair signs, the next committee member should sign, then the next, and so forth. Finally, the graduate support team will report the results to the Graduate College.

Dissertation Defense

The dissertation for a PhD in Geographic Information Science may take the form of a single monograph or three article-length papers. This is to be decided in consultation with the supervisory committee members. For the three article-length papers option, the research papers:

- Should be led by the student (generally reflected by the first authorship of the student)
- Should have journal article quality as determined by the student’s committee
- Do not need to be submitted or published to be considered complete
- Should include a comprehensive introduction and conclusions chapters that tie the three papers together (see here)
- Cannot include a paper that was applied towards a prior degree

Upon approval of the dissertation by the supervisory committee, the student will schedule an oral defense of the completed dissertation. The student should adhere to all Graduate College procedures and deadlines for scheduling the defense and submitting the completed dissertation.

Performance and Annual Review

To ensure that PhD students are making progress towards their degree in a timely manner, and to ensure the student’s responsibilities are being met, the SGSUP faculty graduate committee, student’s faculty advisor and RA/TA faculty supervisors will review students’ progress annually. The Annual Review is an opportunity to address any extenuating circumstances that may contribute to delays in completing milestones. Students must work with their faculty advisor to develop a plan and timeline for getting back on track and include this in the Annual Review. Reviews are conducted every spring; the graduate support team will send instructions and deadlines to students at the appropriate time.

Unsatisfactory reviews or failure to submit the annual review may result in a written warning. Refer to Probation, Remediation, and Dismissal for details.
Certificate Programs

Transdisciplinary Transportation Studies Certificate

Transportation has emerged as one of the highest priority issues for policymakers, planners, employers, and citizens. The Transdisciplinary Transportation Studies certificate program enhances the education of current and future transportation professionals to respond to this challenging environment. It builds upon existing programs in a variety of disciplines offered from four colleges, and two campuses, in the ASU system. The program approaches the subject from an integrated systems perspective and exposes students to a range of transportation alternatives and the interrelationships between transportation and economics, social equity, land use, technology, policy, energy, and the environment.

The certificate program offers current ASU graduate students and transportation professionals the opportunity to pursue a wide range of transportation-related issues from a multimodal, interdisciplinary perspective. Students are expected to attend transportation-related seminars and events offered by the different disciplines. Requirements to attend a certain number of these events will be built into PUP 564 and PUP 593 class requirements.

Students wishing to earn the certificate must apply to Graduate Admissions. Refer to the Graduate College Policies and Procedures Handbook for certificate policy. The certificate is intended to be a specialization within an existing graduate degree program, but a master’s degree is not required for admission.

Certificate Requirements

<table>

</tr>
</tbody>
</table>

* The certificate is intended as a transdisciplinary program. Students should choose transportation-related electives following these guidelines:

1. 3 credits from any school in The College of Liberal Arts and Sciences (e.g., School of Geographical Sciences and Urban Planning)
2. 3 credits from a college outside of The College of Liberal Arts and Sciences (e.g., Fulton Schools of Engineering)
3. 3 credits from a third subject prefix not fulfilled by #1 or #2 above (ex. AMT, CEE, GCU, GIS, PAF, PUP, SOS)

Course Requirements

The listed classes are required and cannot be waived or substituted. A maximum of 5 credits of 400-level coursework may be included on the plan of study but must be approved by the Transdisciplinary Transportation Studies certificate program coordinator.
Transdisciplinary Transportation Studies (Certificate)

Pre-admission Credit
No more than 6 credits taken prior to admission into the certificate program may be included in the plan of study.

Capstone
The Applied Project consists of an in-depth capstone research paper or professional project. In developing a capstone paper, students are encouraged to work with transportation professionals in their area of interest to identify a topic that is of interest to the broader public.

A thesis, dissertation, or individual applied professional project that focuses primarily on transportation may substitute for a capstone paper, if approved by the Director of the certificate program. In such cases:

1. The student must still register for and pass the PUP 593 requirement by attending scheduled class meetings, submitting a copy of their completed thesis, dissertation, or individual applied professional project, and presenting it in the capstone final presentations.
2. Since no additional work is being done other than the presentation, the student and Director will agree on an additional three-credit transport-related course.

The transportation certificate capstone paper does not replace a final culminating experience for a MUEP degree (thesis, applied project, or capstone)

Use the Transdisciplinary Transportation Studies certificate Plan of Study to assist in planning coursework. Suggested elective lists are available at the Plans of Study and Handbook webpage, in the Approved Electives and Suggested Course Lists section.

For more information regarding the Transdisciplinary Transportation Studies Certificate, please contact the Director, Michael Kuby, at mikekuby@asu.edu.
Geographic Information Science Certificate

The Geographic Information Science (GIS) certificate program is a structured interdisciplinary program offered through the School of Geographical Sciences and Urban Planning. Students earn the certificate through GIS coursework taught at ASU. This program provides students with the training and experience necessary to compete, work, and teach in the GIS arena in both public and private sectors.

Students wishing to earn the GIS Certificate must apply to Graduate Admissions. Refer to the Graduate College Policies and Procedures Handbook for certificate policy. Eligible applicants must be currently enrolled in a graduate program at ASU or be a practicing professional with a previously earned master’s degree.

No more than 6 credits taken prior to admission into the GIS certificate program may be included in the plan of study.

Use the GIS certificate Plan of Study to assist in planning coursework.

For more information on the GIS Certificate program, please contact Shea Lemar at shea.lemar@asu.edu.
Social Science Research Methods Certificate

This program is designed for applicants who hold a minimum of a bachelor’s degree from regional, national, or internationally accredited institutions, and in any field/discipline (e.g. anthropology, sociology, human development, sustainability, geography, political science, or other approved fields).

The Social Science Research Methods (SSRM) certificate program prepares students and professionals to acquire, manage, and analyze a broad range of data on human thought and human behavior. Data can be qualitative (e.g. text, images, sound) or quantitative (e.g. direct observation, surveys, geospatial). Data acquisition skills may include the downloading and managing of information from online sources or the primary collection of data in surveys or in direct observation. A key feature of this program is a focus on data analysis, so students and professionals will be able to analyze and interpret any data that they collect.

Students wishing to earn the SSRM Certificate must apply to Graduate Admissions. Refer to the Graduate College Policies and Procedures Handbook for certificate policy. Applicants must have completed an introductory course in statistics before admission to the program.

No more than 7 credits taken prior to admission into the SSRM certificate program may be included in the plan of study.

Use the SSRM certificate Plan of Study to assist in planning coursework.

For more information on the Social Science Research Methods Certificate program, please contact Sherry Thurston at sherry.thurston@asu.edu.
APPENDICES

MUEP Internship
NEURUS Study Abroad Program
International Student Resources
Graduate Wellness Resources
Best Practices in Graduate Student Wellbeing
Appendices

MUEP Internship

The MUEP Internship Program provides students the opportunity to go into the professional community and develop their working skills. An internship also gives insights about the professional planning world and its demands, and about a particular community or focus area. While this is a practical experience, we also encourage students to reflect on what they have learned.

For students interested in obtaining an internship:

- Explore Internships and Employment Opportunities on the school website
- Watch for other job and internship announcements sent via email
- Attend the Planning Meet and Mingle, held each year in late March or early April
- Make an appointment with Matthew Gomez, MUEP Program Coordinator Sr.

Earning Credit

In order to earn credit for an internship, MUEP students must enroll in PUP 584 Internship, a variable credit course that counts as an elective. Up to six (6) elective credits may be earned via internship.

<table>
<thead>
<tr>
<th>PUP 584 INTERNSHIP CREDITS EARNED</th>

</thead>
<tbody>
<tr>
<td>3</td>
<td>9</td>
<td>135</td>
</tr>
<tr>
<td>6</td>
<td>18</td>
<td>270</td>
</tr>
</tbody>
</table>

Additional Requirements

Students must complete an Internship Plan prior to starting the internship.

The intern will keep a weekly work log indicating the type of tasks he/she is performing, and the hours worked. On completion of the internship, the intern’s supervisor will sign the work log to confirm its accuracy. The supervisor will also complete an evaluation form to give feedback on the quality of the intern’s work.

It is the intern’s responsibility to represent the School of Geographical Sciences and Urban Planning positively through conscientious and professional behavior, attitude, and appearance.

For more information, contact matthew.b.gomez@asu.edu, sgsup.careeradvising@asu.edu, or visit the internship website.
NEURUS Study Abroad Program

SGSUP students have the opportunity to study a regional, planning, or urban studies issue of interest in Europe through the Network for European and United States Regional and Urban Studies (NEURUS) program, which promotes scholarly exchange among students and faculty from around the globe. ASU participants travel to Europe in the fall, where they conduct original research, study the host country’s language, and participate in a workshop on research design and methods with the European students. Potential host universities include the University of Groningen in the Netherlands, Corvinus University of Budapest in Hungary, Humboldt University Berlin in Germany, and Vienna University of Economics and Business Administration in Austria.

European students then travel to the U.S. in the spring to conduct research and take part in a workshop on the interpretation and application of comparative research with the U.S. students. At the conclusion of the program, participants typically have completed their thesis or applied project and built a network of international planning contacts.

Interested students should contact Sara Meerow in the fall of the year prior to when they’d like to participate to discuss potential projects, sites, and logistics. Research proposal development and host university pairing typically occur in the late spring, with travel commencing the following fall. Funding to defer travel costs is available through SGSUP and ASU. ASU tuition and fees cover those at the host university. The NEURUS program is conducted in English; no knowledge of the host country’s language is required. More information on the NEURUS program is provided on the program webpage.

International Student Resources

Admission

Graduate Admissions provides resources for international students, including:

- Immigration Steps (includes immigration document and task checklist, with deadlines)
- English Proficiency requirements

Financial Guarantee

International students must submit valid financial guarantee to ASU. You will receive a notification in your Priority Tasks module in MyASU when this is required. A registration hold will be placed on your account until the documents are received. Newly admitted students should submit financial guarantee documents to Admissions at sponsorbilling@asu.edu.

International Students and Scholars Center

Support for admitted international students is largely provided by the International Students and Scholars Center (ISSC). Visit ISSC for assistance with:

- Maintaining legal status in the United States
- SEVIS Registration
- Changing or Extending I-20/DS-2019
- Passport and Travel
- Enrollment concerns related to
Appendices

- Maintaining Enrollment
- Reducing Course Load
- Taking a Leave of Absence

● On-campus Employment

● Optional Practical Training (OPT)
  - OPT is an employment authorization benefit for F-1 students to gain practical experience in their field of study by working off-campus for a total of twelve months.
  - The 12-month OPT can be obtained while school is in session, after completion of a degree program, and during the summer.
  - Students who receive a bachelor’s, master’s, or doctoral degree in an approved STEM field are eligible for an additional 24 months of OPT. The MAS-GIS program and the Geographic Information Science PhD programs are STEM-designated degrees.

● Curricular Practical Training (CPT)
  - CPT is an off-campus employment authorization for F-1 students who must complete an internship course in order to graduate from their current degree program.
  - Employment starts at the beginning of the semester or summer session and completes at end of the semester or summer session.
  - The use of CPT does not impact eligibility for Optional Practical Training (OPT) unless you use more than 12 months of full-time CPT. When you use 12 months of full-time CPT, you will not be eligible for OPT.

Advising is available by appointment or walk-in. Various documents and forms are available at the ISSC Document Request webpage.

International Teaching & Research Assistants

International students on F-1 or J-1 visas may hold teaching or research assistantships. H-1B visa holders are not eligible for TA/RA appointments. Please refer to ASU Human Resources for more information.

The International Teaching Assistant (ITA) Program provides resources for international students related to teacher training, testing, and language support. The SPEAK Test, SPEAK Workshops, and the ITA Teacher Training Course are administered through the ITA program.

English language Proficiency

- Non-native English speakers may be eligible for a teaching assistant appointment if they can demonstrate spoken English proficiency as outlined by ITA.
- There are four ways a student can fulfill the English language requirement. Any of the following will fulfill the language requirement:
  1. Pass SPEAK test with score of 55+ for full certification or a score of 50 for certified with qualifications.
  2. Pass iBT (internet-based TOEFL) with score of 26 for full certification or a score of 24 for certified with qualifications.
3. Pass IELTS with score of 8 for full certification or a score of 7.5 for certified with qualifications
4. Complete ITA Teacher Training Course with score of ‘certified.’

Important information about TOEFL waivers – The TOEFL waiver offered to students for admission purposes does not extend to spoken English certification. To become certified to teach, demonstrating spoken English comprehensibility through one of the four above-mentioned methods is required.

Visit the ITA website for more details and how to enroll in SPEAK or ITA Teacher Training Course.

Student and Cultural Engagement

International Student Engagement provides students with many opportunities to get involved through a variety of co-curricular programs and activities. Resources available include:

- International Student Guide (information on visa, housing, finances, recreation, and more)
- Coalition of International Students promotes communication among all international student organizations to coordinate and consolidate activities of international students while promoting understanding among the various cultures within the university and community at large.

10 Best Practices in Graduate Student Wellbeing

Graduate school necessarily stretches us. When we strive to achieve experiences, content and context expertise, and professional mastery, we rely on every part of our intellectual, emotional, physical and purposeful self. Stretching in these ways is inherently stressful, and according to the National College Health Assessment (NCHA) graduate students report stress, feeling exhausted, and anxiety to be factors that can surface in different ways than they did in undergrad.

Read up on some of the ways you can care for yourself through increasing academic rigor and demands.

Create a sleep routine for 7-9 hours at the same time every night. Our bodies crave routine for resting; we engage in our best sleep when our bodies follow the routine we set.

Get out of your study/writing/lab space every day and sit or walk outside for 15 minutes. Give yourself a break that includes natural light and a change of environment.

Choose an exercise routine that matches your needs. Do you need to laugh and be social? Do you need alone time? Do you need vigorous exercise or movement that includes meditation? Your needs may change, so open yourself to the variety of ways to move your body that meet what you are needing during your week. Sun Devil Fitness is free for students and offers many different paths to keep active and centered.

Learn a good breathing technique for calming your body. Breathing is the one physiological part of your body that you can consciously control, and it impacts all other physiological functioning. Try a 4-7-8 breath a couple times a day to lower your body's reaction to stress.

Remind yourself of the bigger meaning in your work. What are you learning? How will this challenge help you or how will it make you stronger in the future?

Connect with other graduate students. ASU has hundreds of graduate student programs, leaving a wide array of communities in which to connect.

Ask your mentors/supervisors what they need/want/expect from you in your role. Generate conversation about their answer in an authentic way. Having clear communication from the start will help you return to conversations in the future.

Do something that isn’t graduate school every week. You have many identities, and one of them is graduate student. Ensure you are supporting your whole self through this journey. Make this form of self-care important enough to schedule into your calendar.
