Graduate Student Job Opportunities at ASU’s Decision Theater (Tempe Campus)

What is Decision Theater?
Solutions to complex problems require a strategic approach. The Decision Theater organizes researchers, policymakers and the business community to better understand and explore solutions to complex issues facing society. Using data analytics and high-performance computing to drive software-integrated models, DT works with transdisciplinary partners to streamline big data and transform it into novel, interactive data visualizations.

By combining a variety of technical capabilities, DT facilitates the collaborative engagement between different groups in the pursuit of comprehensive, useful, data-driven models that build shared understanding and perspectives. Managing the convergence of multiple disciplines, datasets, ways of knowing and approaches to governance is essential to the DT collaboration process.

Decision Theater collaborators include Adidas, Conservation International, The American Academy of Diplomacy, U.S. Army, Decision Center for Educational Excellence Powered by Helios Education Foundation, Arizona Board of Regents, Ho Chi Minh City, Tecnológico de Monterrey, University of Exeter, National Science Foundation, and many others.

Interested?
For more information about software development opportunities, please contact Ramesh Gorantla, Software Development Lead, at rameshgorantla@asu.edu.

For more information about opportunities related to machine learning or statistical analysis, contact Sri Kandala, Manager and Research Scientist at Srivatsav.Kandala@asu.edu or Fangwu Wei, Data Scientist, at Fangwu.Wei@asu.edu.
