Graduate Services Assistant (GSA)
Decision Center for a Desert City
Julie Ann Wrigley Global Institute of Sustainability

Scope:
Develop a longitudinal survey to assess current state of land use and water resource planning integration in the Colorado River Basin.

Desired experience:
Experience with survey research design and developing theoretical framework and conceptual constructs including identifying specify key social, psychological, institutional, professional, and technical factors relevant to a research topic, identifying established methods of assessment for these factors, including valid and reliable questionnaire scales, identifying relevant aspects of the units of analysis, and assessing various protocols for deploying survey.

Knowledge of land use and water resource planning and policy development is beneficial but not necessary.

Funding:
This fall 2019 GSA position is funded by a grant from the Babbitt Center for Land and Water Policy. The graduate student will work 500 hours with a total salary of $12,500.
