The City of Peoria is recruiting for the fall semester to join the robust team within the Traffic Engineering Division. Your role will be to work on meaningful projects providing real-world solutions for all forms of Integrated Transportation including pedestrian, cyclist, fixed-route and circulator buses, motor vehicles, and the autonomous shuttle.

The candidate will gather public sector knowledge regarding the application of planning theory, policy creation, and the socioeconomic impacts of collaborating within the built environment.

This unpaid remote internship will utilize virtual meetings and requires a personal computer. Coordination with ASU for credit in Course 484/584 included. Moderate proficiency in ArcGIS and Office required and Microsoft VISIO preferred.

Application review will begin on August 12, 2020. Please include your résumé and a writing sample when responding through email. The position will be nine hours per week with weekly check-in meetings.
