Undergraduate Research Fellows Program

with

the School for the Future of Innovation in Society

The SFIS Undergraduate Research Fellows (SURF) Program is designed to give undergraduate students across ASU a chance to develop research and critical thinking skills by contributing to a research project on a science & society topic. Come gain research experience – and earn a stipend or research credits!

This semester, we invite students to work with faculty on researching topics as diverse as body modifications, sustainable communication, communicating conservation science through dance, and building digital medical libraries. Through the Undergraduate Research Fellows program, you will have the opportunity to develop strong research skills and present your findings at an end-of-semester research symposium.

Research Fellows can choose to receive a stipend ($1200 per semester) or research credit (2 credits per semester). You will be expected to spend 5-7 hours per week as a Research Fellow, including a weekly meeting with your faculty mentor.

More details about the program and available projects for Fall 2019 are available at: https://sfis.asu.edu/student-life/opportunities.

Applications are due by 11:59pm on Sunday, August 11th. Research projects will start the week of August 26th, 2019. Online applications for Research Fellow positions are available at: https://sfis.asu.edu/student-life/opportunities

For questions, please contact Elisha Thompson (Elisha.Thompson@asu.edu).
