

Student Worker Position – Mapping Medications for Opioid Use Disorder in Arizona

Profs. William Riley and Matthew Martin in College of Health Solutions and Prof. Daoqin Tong in School of Geographical Sciences and Urban Planning seek a student worker to help with data management for the project Assessing Disparities in Medications for Opioid Use Disorder in Arizona using a Geographic Information System, funded by SATRN's Glen J. Swette Seed Grant Program for Community-Academy Substance Use Research Partnerships.

The salary for this position is \$8,000 (\$18-21/hr). The start date is May 3rd or after. The position includes flexible weekly hours, the ability to work from home, and the potential for continued employment in future projects.

Required Qualifications

- Experience with manipulating datasets (GIS data preferred)
- Ability to construct platforms for data sharing and visualization (GIS-based preferred)
- Ability to work and think independently
- Good communication skills

Preferred Qualifications

- Familiarity with national, state and local health data sources
- Interest in community health issues

To apply, please send:

1. A cover letter explaining your interest in the project and how your skills match the qualifications stated above
2. A current resume or C.V.
3. Contact information for three references
